

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Democratic Republic of the Congo. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

It's great that you're thinking carefully about your next step! Since you're 16, living in Denmark, and have completed primary school, you're at an important decision point — typically the transition to *ungdomsuddannelse* (upper secondary education). Let's break it down so you can think about what might suit you best.

Your options after primary school in Denmark

In Denmark, there are several types of upper secondary education programs, each with different focuses:

1 Gymnasiale uddannelser (General upper secondary education)

These programs prepare you for university or other higher education:

- **STX (Alment gymnasium)** – Broad academic focus (languages, humanities, social sciences, natural sciences)
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international trade
- **HTX (Teknisk gymnasium)** – Focus on technology, science, and technical subjects
- **HF (Højere forberedelseseksamen)** – Shorter, more practice-oriented, often for those who prefer a less traditional academic path (usually 2 years)

2 Erhvervsuddannelser (Vocational education and training, VET)

- Combine school with hands-on training at a workplace (apprenticeship)
- You learn a trade or profession (e.g., electrician, chef, carpenter, IT-supporter)
- Leads directly to employment or, in some cases, further education

Which path could suit you?

Here are some questions to reflect on:

- Do you enjoy academic subjects and see yourself going to university later? → **STX, HHX, HTX, HF**
- Are you more motivated by practical work, earning while learning, and entering a profession soon? → **VET (erhvervsuddannelse)**

- Do you have specific interests (e.g., business, technology, design, health, social care)?
-

Recommendations based on your background

✓ If you like a broad academic education:

Consider **STX** — it keeps many doors open (humanities, science, social science).

✓ If you're interested in business or entrepreneurship:

HHX could fit well, especially with your multicultural background — understanding international business might appeal to you.

✓ If you like technology, science, or innovation:

HTX could be great, especially if you like problem-solving or working on projects.

✓ If you prefer hands-on learning and want to start a career sooner:

VET could give you a solid, practical profession — Denmark values skilled workers highly.

Other things to think about

- Many schools offer guidance counselors — it's worth booking a meeting.
 - You might also consider international or bilingual programs if that interests you.
 - Since you speak Danish fluently, all options are open to you in terms of language!
-

If you want, tell me:

- What subjects do you enjoy most?
- Do you have an idea of what kind of job or field you might want in the future?
- Do you prefer studying, doing practical work, or a mix?

I can help you narrow it down further based on your interests!
