

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Denmark. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that context! It's great that you're thinking carefully about your next step. In Denmark, after finishing **primary school (folkeskole)**, you have several educational paths to choose from, depending on your interests, strengths, and future goals. Let me outline your main options, and I'll suggest how you might choose:

1 **Gymnasiale uddannelser (Upper secondary general education)**

These are good if you enjoy academic subjects and think you might want to go to university later.

- **STX (Alment gymnasium)** → A broad education with focus on humanities, natural sciences, and social sciences.
- **HHX (Higher Commercial Examination Programme)** → Focus on business, economics, and international subjects.
- **HTX (Higher Technical Examination Programme)** → Focus on technology, natural sciences, and innovation.
- **HF (Higher Preparatory Examination Programme)** → Shorter (2 years), more practical/theoretical mix, good if you want flexibility or didn't thrive in a traditional school setting.

👉 *Choose this path if you like schoolwork, want to keep your options open for university, and enjoy subjects like languages, science, history, or business.*

2 **Erhvervsuddannelser (Vocational education and training / VET)**

- These programs combine school and apprenticeship (praktik). You learn a trade (e.g. carpenter, hairdresser, chef, electrician, IT-supporter).
- Typically 3-5 years, you get a professional qualification and can start working or later take a *eux* track (which combines VET with a gymnasium-level exam for university access).

👉 *Choose this if you like practical, hands-on learning and want to start working sooner, or if you have a clear idea of a profession you want.*

Other possibilities

- **10th grade (10. klasse)** → If you're unsure and want more time to mature academically or personally before deciding. Some schools offer 10th grade focused on specific interests (e.g. sports, music, international).
- **Efterskole / højskole** → A year where you live at school and focus on personal development, social skills, or specific interests like sports, music, design, or outdoor activities.

☀️ How to choose?

Here are some good questions to ask yourself:

- ✓ Do I enjoy academic subjects and schoolwork, or do I prefer practical, hands-on learning?
- ✓ Do I want to go to university later, or am I more excited about getting a job after my education?
- ✓ Are there subjects or fields I'm passionate about (e.g. business, technology, craftsmanship)?
- ✓ Would I like a break or different experience before deciding (e.g. 10th grade, efterskole)?

🔑 My recommendation (based on what you've shared so far)

➡ Since you've just finished primary school and are considering your next step, I'd suggest:

- **If you like academic subjects and want to keep many doors open:** Consider STX, HHX, or HTX — depending on your interests.
- **If you're unsure:** A 10th grade or a year at efterskole could give you valuable time to reflect and grow.
- **If you're drawn to a specific trade or hands-on work:** Look at vocational education or a *eux* program to combine practical skills with academic qualifications.

If you tell me more about your interests (e.g. favorite subjects, hobbies, career dreams), I can give a more tailored recommendation! Would you like help exploring specific schools or programs in your area? 😊
