

# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Denmark. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that context! It's great that you're thinking carefully about your next steps. Since you're 16, have finished primary school (which in Denmark usually includes **folkeskole** up to 9th or 10th grade), and are fluent in Danish, you now have several common educational paths to choose from. The best option depends on your interests, strengths, and future plans.

Let me outline the main paths available to you in Denmark after primary school:

## Gymnasiale uddannelser (Upper Secondary Education – Academic Track)

If you want to keep your options open for university or higher education, these are good choices:

- **STX (Studentereksamen)** – Broad academic program with focus on humanities, sciences, and social sciences. Good for those who want many future study options.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and international relations.
- **HTX (Higher Technical Examination)** – Emphasis on technology, science, and technical subjects.
- **HF (Higher Preparatory Examination)** – Shorter, more practice-oriented (usually 2 years), good if you want a faster path to higher education.

 Recommended if: You enjoy school subjects, want to go to university, and aren't sure yet what specific career you want.

## Erhvervsuddannelser (Vocational Education and Training, EUD)

If you prefer practical learning, working with your hands, or getting into a trade or profession:

- Examples: Carpenter, electrician, chef, hairdresser, healthcare assistant, etc.
- Combines school and paid apprenticeship/workplace training.

 Recommended if: You want to learn a specific trade, earn while you learn, and maybe work sooner rather than later.

## EUX (Combination of Vocational + General Upper Secondary)

- A mix of vocational training with a curriculum that qualifies you for higher education.

- You get both a vocational certificate and a gymnasial-level diploma.
- More demanding but gives a lot of flexibility.

👉 Recommended if: You want both practical skills and the option for higher studies later.

---

## Other options

- **International programs** (if you want to study in English or prepare for studies abroad).
  - **10th grade** (if you feel you need more time to decide or want to strengthen your academic skills).
- 

## How to decide?

- ✓ Think about what subjects you like.
  - ✓ Do you prefer practical or academic learning?
  - ✓ Do you want to start working soon, or study longer?
  - ✓ What career ideas do you have?
- 

If you'd like, I can help you:

- Make a pros/cons list for each option.
- Explore specific schools or programs near where you live.
- Find a guidance counselor resource in Denmark (e.g. **Studievalg Danmark**, **UU-vejledning**).

👉 If you tell me about your interests, hobbies, or what subjects you like most, I can give a more personal recommendation! 😊
