

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Djibouti. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step! In Denmark, after finishing *folkeskole* (primary and lower secondary school), you have several good educational options depending on your interests, strengths, and future goals. Let's break down the main paths and what might suit you:

Main educational options after folkeskole

1 Gymnasiale uddannelser (General Upper Secondary Education)

If you enjoy academic subjects and might want to go to university later, this is a good path. Types include:

- **STX (Studentereksamen)** – Broad academic program with focus on humanities, social sciences, natural sciences.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and international trade.
- **HTX (Higher Technical Examination)** – Emphasis on technology, natural sciences, and innovation.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), often for those who want a more practical academic path, e.g. for teacher training or nursing.

 *Best if you like studying theory, and want flexibility for university.*

2 Erhvervsuddannelse (Vocational Education and Training – EUD)

If you prefer hands-on learning and want to enter the job market sooner (or do a practical trade or craft), this could be for you. You combine school time with apprenticeship/workplace training.

Examples:

- Electrician
- Carpenter
- Chef
- Hairdresser
- Social and health care assistant

 *Good if you want practical skills, earn while you learn, and possibly start work earlier.*

3 Kombinerede veje (EUX)

A mix of vocational training and upper secondary education – you get both an apprenticeship and the qualifications to apply for university.

👉 *Best if you want both practical skills and academic options later.*

4 10. klasse (optional)

If you're unsure and want more time to decide, you could take an extra year (10th grade), either in your local school, at an *efterskole*, or other program.

☀ Things to think about

- Do you enjoy theoretical subjects (math, science, literature) or practical, hands-on work?
 - Are you thinking of university later, or would you like to start working earlier?
 - What are your interests? (e.g. technology, business, art, health, trades)
 - Would you like an international element? (HHX or STX could offer languages, business, global studies.)
-

✨ My suggestion

- ✅ Since you are fluent in Danish and grew up in Denmark, all options are open to you!
 - ✅ If you are unsure but want to keep many doors open, **STX or HHX** could be a great start — they give a broad academic base and keep options open for university.
 - ✅ If you know you like working with your hands or a specific trade, **EUD** or **EUX** could be ideal.
-

💡 **Tip:** You can talk to a *UU-vejleder* (youth guidance counselor) in your municipality — they can help you explore your options and even arrange for you to visit schools or programs.

If you tell me more about what you like (for example, subjects you enjoy most, or jobs you can see yourself doing), I can help you narrow down the best choice! Would you like that? 😊
