

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Djibouti. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a really thoughtful question — it's great that you're already thinking carefully about your next steps! I can give you some guidance based on the Danish educational system and your background. Since you've just finished *folkeskolen*, here are the main options you can consider:

1 Gymnasiale uddannelser (Upper secondary education)

If you're interested in academic studies and perhaps planning to go to university later, this is a typical path:

- **STX (Almen studentereksamen)** – General upper secondary education with a broad mix of subjects (science, humanities, social sciences). Good if you want to keep your options open.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international topics. A good choice if you're interested in business or global trade.
- **HTX (Højere teknisk eksamen)** – Focus on technology, natural sciences, and technical subjects. Great if you like science, IT, engineering, etc.
- **HF (Højere forberedelseseksamen)** – Shorter, 2-year program that prepares you for higher education, more practical/theoretical mix.

 *Recommendation:* Since you're fluent in Danish and have a multicultural background, STX or HHX could open doors to both university and international opportunities, but it depends on your interests.

2 Erhvervsuddannelser (Vocational education and training - EUD)

If you'd rather start learning a trade and working sooner, you could consider:

- **Apprenticeships (EUD)** in areas like carpentry, electrician, health care assistant, chef, IT supporter, etc.
- You'll split time between school and practical work in a company.

 *Recommendation:* Great if you prefer hands-on learning and want a faster route to the job market.

3 Kombinationer & alternativer

- **EUX** – Combines vocational training with upper secondary education, so you can both learn a trade and qualify for university.

- **International programs** – Some schools offer International Baccalaureate (IB) if you want more of a global focus.
 - **10th grade (10. klasse)** – If you feel unsure or want to strengthen skills before deciding.
-

✨ What to think about

Ask yourself:

- ✓ What subjects or activities do I enjoy most?
 - ✓ Do I want to study longer or start working sooner?
 - ✓ Am I interested in staying in Denmark or perhaps working internationally later?
-

💡 Final advice

- Visit open house events (*infoaftener*) at different schools to get a feel for them.
- Talk to your *UU-vejleder* (youth guidance counselor) — they can help you choose the best fit.
- Consider your strengths: with your fluency in Danish and your multicultural perspective, you might thrive in fields like international business, technology, health, or social work.

If you want, tell me about your interests and dreams — I can help you narrow down the path that suits you best! 🚀
