

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Dominican Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're already thinking carefully about your next step. Since you just finished primary school in Denmark (Folkeskole), your next step is typically one of the **youth education programs (ungdomsuddannelser)**. The right path for you depends on your interests, strengths, and future goals, but I'll outline your main options and when they might fit you well.

Main Education Paths After 9th or 10th Grade in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic high schools that prepare you for university:

- **STX** (Studentereksamen): General academic – broad mix of humanities, sciences, and social sciences.
- **HHX** (Higher Commercial Examination): Focus on business, economics, marketing.
- **HTX** (Higher Technical Examination): Focus on technology, IT, and science.
- **HF** (Higher Preparatory Examination): Shorter (2 years) and more flexible — good if you want to finish earlier or take a more practical route to higher education.

✓ Good choice **if you like school and want to go to university later.**

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These combine school and hands-on work training (apprenticeships). You can train to become e.g.:

- Electrician, plumber, carpenter
- Hairdresser, chef
- Healthcare assistant
- IT supporter

You can start directly after 9th or 10th grade, and it can also lead to further education if you later decide to go to university via **EUX** (a combination of vocational and academic education).

✓ Good choice **if you want to work with your hands or get a job quickly.**

3. EUX – The Hybrid Path

Combines **vocational training** with **academic subjects**, so you become both a skilled worker **and** get a diploma that qualifies for university.

✓ Good if you want the **flexibility of both worlds** – e.g., becoming an IT supporter now, and maybe studying computer science later.

A Note on Your Background

Your Danish fluency is a huge strength. Also, your Dominican heritage can give you a unique perspective — if you're interested in **language, culture, or international work**, those could be great areas for you to explore.

How to Decide

Ask yourself:

- Do I enjoy academic subjects and want to study more in university? → Go with **STX, HHX, HTX**, or **HF**.
- Do I want to start working sooner, and learn by doing? → Choose **EUD** or **EUX**.
- Am I interested in a specific area already (e.g., tech, business, health, design)? → Pick a path that fits that field.

Recommendation Example

Let's say:

- You're curious about **technology and innovation** → **HTX** or **EUX in IT**.
- You enjoy **economics, marketing, or international trade** → **HHX**.
- You want to work in **health or social care** → **EUD – Social og Sundhed**, or **HF with health line**.
- You're still not sure → Try **10th grade (10. klasse)** to explore more before committing.
