

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Dominican Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

It's great that you're reflecting on your next step — and congratulations on completing primary school! Since you're 16 and living in Denmark, you're at a point where you can choose from several educational paths that fit your interests, strengths, and future plans. I'll outline the main options and give you some guidance based on your situation:

📌 Main Educational Paths After Primary School (Folkeskole)

1 Gymnasium (STX, HHX, HTX, or HF)

These are upper secondary schools that prepare you for university.

- **STX (Alment Gymnasium)** – Broad academic education, includes languages, science, humanities, and social studies. Good if you want to keep many options open.
- **HHX (Handelsskole)** – Focus on business, economics, and international trade. Could be interesting given your multicultural background and if you're interested in business.
- **HTX (Teknisk Gymnasium)** – Focus on technology, science, and technical subjects. Great if you like math, IT, or engineering topics.
- **HF (Højere Forberedelseseksamen)** – Shorter (2 years), more practical and focused on preparing for specific higher education or professions.

➡ *Recommended if:* You enjoy academic subjects and might want to go to university later (in Denmark or abroad).

2 EUD / EUX (Erhvervsuddannelser / Erhvervsuddannelse med Gymnasial Eksamen)

Vocational education and training (apprenticeships) — you combine school and practical work in a company.

- **EUD** – Pure vocational training, you learn a trade (e.g. carpenter, hairdresser, chef, mechanic, etc.)
- **EUX** – A mix of vocational training and a gymnasium-level exam, so you can also go to university later.

➡ *Recommended if:* You want to work in a specific trade and like hands-on learning, but still want to keep doors open for further education.

Other options

- **International education / IB (International Baccalaureate)** – If you want an international diploma, maybe with an eye on studying abroad.
- **Special preparatory programs (FGU)** – For young people who aren't sure or need extra preparation before starting a youth education.

Things to consider

Since you're fluent in Danish and have roots in the Dominican Republic, you might have extra strengths:

- ✓ Strong language and cultural skills — this could be valuable in international business, diplomacy, tourism, or education.
- ✓ Multicultural background — could give you unique perspectives in social sciences, humanities, or global studies.
- ✓ If you enjoy certain subjects (e.g. science, art, tech, languages, social studies), that could guide your choice.

My suggestion

If you:

- Enjoy academic work → **STX** or **HHX** (especially if interested in international business/economics)
- Like science/tech → **HTX**
- Like working with your hands or learning a trade → **EUX**
- Want something shorter or more practical → **HF**

You might want to visit open house events at local gymnasiums or vocational schools, and talk to a counselor (studievejleder) — they can help you figure out what fits you best.

If you'd like, tell me:

- What subjects or activities do you enjoy most?
- Do you think you'd like to go to university later?
- Do you prefer practical or academic learning?

That way I can give you an even more tailored recommendation!
