

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Dominican Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking ahead about your future! Since you're 16, just finished primary school (in Denmark, that's **folkeskolen**, typically at 9th or 10th grade), and you're fluent in Danish, you have several good options. I'll outline the main educational paths available in Denmark, along with things to consider based on your background and interests.

Main educational paths after primary school in Denmark

Gymnasiale uddannelser (Upper secondary school - academically focused)

These are designed if you want to prepare for higher education (like university).

- **STX** (Alment gymnasium): Broad general education, mix of humanities, sciences, social sciences. Good if you want to keep many options open.
- **HHX** (Higher commercial exam): Focus on business, economics, and international studies.
- **HTX** (Higher technical exam): Focus on technology, natural sciences, and IT.
- **IB (International Baccalaureate)**: If you like English-language instruction, and want an international option (some Danish schools offer this).

 **Good for you if:** You like school subjects, want to go to university later, and enjoy academic learning.

Erhvervsuddannelser (Vocational education and training - EUD)

These combine school with apprenticeship/workplace training. You can train in areas like:

- Carpentry, electrical, plumbing
- Culinary arts, hospitality
- IT support, graphic design
- Health and care professions

 **Good for you if:** You want practical, hands-on training, and to get a job after 3-4 years — though you can still go on to further education if you want (e.g. erhvervsakademi or professionsbachelor).

Kombinationsuddannelser (EUX)

- Combines vocational education + upper secondary academic exam.
- You get both a vocational qualification and the possibility to apply for university.

✓ **Good for you if:** You like practical work, but also want to keep the door open for higher education.

☀ Things to consider

- **Your interests:** Do you enjoy academic subjects (math, languages, science)? Or do you prefer practical work and learning by doing?
 - **Your future goals:** Are you thinking about university? Or would you rather work earlier?
 - **Strengths:** Are you more hands-on, creative, business-minded, technical, caring?
-

📝 My recommendation

👉 Since you're fluent in Danish, born in Denmark, and finished primary school, you're well-prepared for any path. Here's a suggestion:

- If you're unsure what you want yet, **STX** or **HHX** could be great — they keep many options open.
 - If you know you enjoy practical learning, or want a quicker route to a skilled job, consider **EUD** or **EUX**.
 - If you're interested in an international angle (given your Dominican background and maybe Spanish/English skills), **IB** or **HHX** could fit well.
-

💡 Final tip:

It can help to:

- ✓ Visit **uddannelsesmesser (education fairs)**
- ✓ Talk to a **UU-vejleder (youth guidance counselor)**
- ✓ Visit schools' open house events

If you tell me more about your **interests** (e.g. do you love science, art, business, working with people?) I can help you narrow it down even more! Would you like that?
