

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Dominican Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question—congratulations on finishing primary school! 🌟 Let's break it down thoughtfully so you can consider the options that suit *you* best.

🎯 First, some key factors to consider

Since you just finished primary school (9th or 10th grade in Denmark), your options typically include:

- **Gymnasium (STX, HHX, HTX, HF)** – academic upper secondary education that prepares you for university.
- **Erhvervsuddannelse (VET - vocational education and training)** – more hands-on, where you learn a trade and can enter the workforce or continue to higher education (e.g. erhvervsakademi).
- **Kombinationsuddannelser (eux)** – a mix of vocational and academic education, so you can get both a trade and access to university.
- **10th grade (hvis du vil have lidt ekstra tid til at blive klar)** – if you want to strengthen certain subjects or mature a bit more before deciding.

📝 Questions to reflect on

To give a more personalized recommendation, consider:

- ✓ Do you prefer academic learning (reading, writing, theory) or practical/hands-on work?
- ✓ Do you have interests or dreams already (e.g. business, science, IT, design, crafts, health)?
- ✓ Do you think you want to go to university later, or would you prefer to start working sooner?
- ✓ Do you enjoy group work, creative tasks, technical challenges, helping others?

🌟 Some example paths

Here are some suggestions depending on your interests:

Interest / Strength	Educational Path	Example Jobs / Studies Later
General academics, flexible future	STX (Almen gymnasium)	Lawyer, doctor, engineer, teacher
Business, marketing, economy	HHX	Economist, entrepreneur, accountant
Tech, science, IT	HTX	IT specialist, engineer, lab technician
Helping professions, social	HF	Nurse, social worker, pedagogue
Crafts, cooking, design, technology	VET (erhvervsuddannelse)	Carpenter, chef, hairdresser, mechanic

Interest / Strength	Educational Path	Example Jobs / Studies Later
Both hands-on + academic	EUX	Same as VET + option for university

Your background as a strength

- ✓ Bilingual/multicultural background is a big plus — could be valuable in international business, tourism, teaching, or social work.
- ✓ Maybe you could consider a path that lets you use language skills, cultural understanding, or global outlook.

My recommendation

Since you're fluent in Danish and have completed primary school in Denmark:

- **If you like school, are curious, and want to keep doors open → STX or HTX.**
- **If you're drawn to business or international trade → HHX.**
- **If you want to work with your hands but keep university as an option → EUX is a smart choice.**
- **If you're unsure → consider 10th grade to explore interests, or visit open houses at gymnasiums and VET schools to get a feel.**

Next steps

- 👉 Talk with a school counselor (studievejleder) — they can help match options to your strengths.
- 👉 Visit education fairs or "åbent hus" events.
- 👉 Think about what subjects make you excited or what kind of work you imagine enjoying.

If you tell me more about your interests (e.g. favorite school subjects, hobbies, dreams), I can give a more precise recommendation! Would you like to do that? 😊
