

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ecuador. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's wonderful that you're thinking carefully about your future! Since you're 16 and just finished primary school in Denmark (I assume you mean *folkeskolen* or 9th/10th grade equivalent), you now have several good options. Let's break them down so you can consider what fits your interests, goals, and strengths best.

🎓 Main educational paths in Denmark after folkeskolen

1 Gymnasiale uddannelser (Upper secondary school / high school)

These are academic programs that prepare you for university or other higher education:

- **STX (Alment gymnasium)** – General upper secondary education with broad subjects (humanities, science, social science).
- **HHX (Handelshøjskole)** – Focus on business, economics, marketing.
- **HTX (Teknisk gymnasium)** – Focus on technology, science, and technical subjects.
- **HF (Højere forberedelseseksamen)** – Shorter 2-year program, more practical, for students who want a flexible route to higher education.

💡 Choose this path if:

You enjoy academic work and are considering going to university (or want to keep that door open).

2 Erhvervsuddannelser (Vocational education and training / VET)

These are practical, hands-on programs that combine school with apprenticeship/internship in a company:

- Example fields: carpenter, electrician, chef, healthcare assistant, graphic designer, IT support, etc.
- You can later take further education (e.g. *Erhvervsakademi*, *Professionsbachelor*).

💡 Choose this path if:

You want to work with your hands, start earning earlier, or build a career through practical experience.

3 Other options

- **Kombineret ungdomsuddannelse (KUU)** – For young people who want extra support or a customized education.

- **10. klasse** – If you want to strengthen your skills before choosing.
- **International education (IB)** – If you're interested in an international study environment (especially good if you're thinking of studying abroad).

✓ How to choose?

Here are some key questions to help you decide:

- Do you enjoy academic subjects, or do you prefer practical learning?
- Do you have a dream job or field already?
- Would you like to study at university in the future?
- Are you motivated by working with people, technology, business, design, etc.?

☀ Recommendation

Since you're fluent in Danish, born and raised in Denmark, and have both Danish and Ecuadorian cultural background — you have great flexibility.

👉 If you want to keep your options open and maybe go to university: **STX or HHX** could be a strong choice.

👉 If you like technology or science: **HTX** is excellent.

👉 If you're eager to start a career with practical experience: **Erhvervsuddannelse** could be very rewarding.

💬 **Tip:** Visit open house events (*Åbent hus*) at local schools. Talk to guidance counselors (*UU-vejleder*). And consider doing a short internship (*brobygning*) to try different options.

If you tell me about your interests (e.g. do you like science, languages, business, working with people?), I can help you narrow it down even more! 🚀
