

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Egypt. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a really thoughtful and important question — and it's great that you're considering your options carefully at this stage. Let's break it down so you can think through what might suit you best.

Educational options after primary school in Denmark

Since you're 16 and have completed primary/lower secondary school (folkeskole), you generally have these main pathways in Denmark:

1 General upper secondary education (Gymnasiale uddannelser)

These prepare you for higher education at university:

- **STX (Alment gymnasium)** – broad academic program (humanities, sciences, social sciences, languages)
- **HHX (Handelsgymnasium)** – focus on business, economics, marketing
- **HTX (Teknisk gymnasium)** – focus on technology, natural sciences, innovation
- **HF (Højere forberedelseseksamen)** – shorter, 2-year academic program (good if you want more flexibility or didn't take 10th grade)

 Best for you if:

- You enjoy academic subjects
- You're interested in university studies in the future
- You want to keep your options open

2 Vocational education and training (EUD / erhvervsuddannelse)

These combine school + apprenticeship in a company. Examples: electrician, chef, carpenter, health care assistant, graphic designer.

 Best for you if:

- You like practical, hands-on work
- You want to start a career faster (often within 4 years)
- You prefer learning by doing rather than lots of classroom work

3 Other options

- **10th grade (10. klasse)** – if you want an extra year to explore, mature, or strengthen skills before upper secondary.
- **International programs** – some schools offer International Baccalaureate (IB) or similar programs if you want an international profile.

🤔 How to choose?

Ask yourself:

- ✓ What subjects do I enjoy the most?
- ✓ Do I prefer practical learning or academic learning?
- ✓ What type of work do I imagine myself doing in the future (even if I'm not sure)?
- ✓ Do I want to study at university later?

🌟 My recommendation

Since you're fluent in Danish, born and raised in Denmark, and have multicultural roots (which can be a big advantage in global or diverse fields!), I'd recommend:

- ➔ **STX or HHX** if you like a broad academic focus or business/economics
- ➔ **HTX** if you enjoy technology, IT, science
- ➔ **EUD** if you already feel drawn to a specific trade or craft

If you're unsure, a good option is:

- ➔ **10th grade** (especially at a school that lets you try different subjects or practical experiences)

💡 Final tips

- 👉 Visit open house events (åbent hus) at schools to get a feel for the environment
- 👉 Talk to a school counselor (UU-vejleder) — they can help match your interests to the right path
- 👉 Remember: No decision is final — Denmark has flexible ways to change track if you realize later you want something else

If you tell me more about what you enjoy (e.g., favorite subjects, hobbies, dream jobs), I can give you a more tailored suggestion! Would you like that? 🚀
