

# Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from El Salvador. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to start — congratulations on finishing primary school!

In Denmark, after completing **Folkeskole** (primary and lower secondary school), you have several main educational paths to choose from depending on your interests, strengths, and long-term goals. Here's a breakdown of your main options, along with some advice tailored to your situation:

## 1. General Upper Secondary Education (Gymnasiale Uddannelser)

These are 2-3-year academic programs that prepare you for higher education (university, professionshøjskole, etc.).

**The three main types:**

- **STX (Alment gymnasium)** – General and academic. Good if you're interested in humanities, science, or social studies.
- **HHX (Handelsskole)** – Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – Focus on technology and natural sciences.
- **HF (Højere Forberedelseseksamen)** – A shorter 2-year program, often for those who want a more practical and mature environment.

 **Best if:** You're academically inclined and want to go to university in the future.

## 2. Vocational Education and Training (EUD – Erhvervsuddannelse)

A practical and job-oriented path where you learn a trade and work as an apprentice.

Examples:

- Electrician
- Mechanic
- Chef
- Hairdresser
- Carpenter
- Social and health care (SOSU)

 **Best if:** You prefer hands-on learning and want to enter the job market more quickly.

### 3. Combined Programmes (EUX)

A mix of academic and vocational education. You get both a vocational qualification *and* the possibility to go to university.

 **Best if:** You want the best of both worlds — practical skills and the option for further study later.

#### What to consider personally:

Given that:

- You're fluent in Danish
- You're of Salvadoran background (you might speak Spanish or have cultural knowledge others don't)
- You've just finished 9th or 10th grade

Here are **3 tailored recommendations**, depending on your interests:

#### **Option A: STX or HHX – if you like school, reading, and big ideas**

- **STX:** If you're interested in languages (like Danish, English, or maybe Spanish), history, or science.
- **HHX:** If you might be interested in business, marketing, or international trade — maybe even something connecting Denmark and Latin America.

**Long-term:** University, business school, or even working abroad.

#### **Option B: EUX – if you like practical work but want to keep doors open**

Example: Become a skilled tradesperson (like electrician or IT support), but with a study program that also allows you to go to university.

**Long-term:** Start working earlier, or study more later if you change your mind.

#### **Option C: EUD – if you want to work soon in a specific profession**

If you already know you like hands-on jobs (like mechanics, cooking, or caregiving), this might be perfect.

**Long-term:** Fast entry to the workforce, and opportunities to specialize later.

#### **Final tips:**

- **Go to open house events** at your local gymnasier and vocational schools.
- **Talk to a UU-vejleder** (educational guidance counselor) — they're trained to help you explore your interests.

- Don't worry if you don't know exactly what you want — many people switch directions later on, and that's completely normal.

Would you like help figuring out which schools near you offer these programs, or help matching your interests to specific study areas?
