

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from El Salvador. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself! It's great that you're thinking carefully about your next step. Since you've completed primary school in Denmark (which typically means you've finished *folkeskole* or the 9th/10th grade), you now have several educational paths to choose from depending on your interests, strengths, and career goals. Let's break down your options and factors to consider.

Main educational paths after primary school in Denmark

Gymnasiale uddannelser (General upper secondary education)

If you're interested in going to university later, this is often the way to go.

- **STX (Alment gymnasium)** – Broad academic education with focus on humanities, science, social sciences.
- **HHX (Handelsskole)** – Focus on business, economics, international trade.
- **HTX (Teknisk gymnasium)** – Focus on technology, natural sciences, IT, engineering.
- **HF (Højere forberedelseseksamen)** – A shorter, 2-year program if you want a faster route to higher education (often chosen if you want a more practice-oriented path).

Erhvervsuddannelser (Vocational education and training - EUD/EGU)

If you want to combine learning with practical work and maybe start earning sooner:

- Apprenticeships + school.
- Wide range: electrician, carpenter, chef, hairdresser, social care assistant, etc.
- You can also choose *EUX*, which combines vocational education with gymnasium-level academic subjects, so you keep the door open for university.

Other options

- **International or bilingual schools** (if you're interested in adding English or Spanish to your strong Danish skills).
- **10th grade** – If you want a year to explore, mature, or strengthen certain subjects before choosing.

How to decide?

- ✓ **Interests** – What subjects do you enjoy? What type of work do you see yourself doing?
- ✓ **Learning style** – Do you prefer academic studies, or do you like hands-on learning?

- ✓ **Future plans** – Do you want to go to university? Work sooner? Maybe study abroad one day?
 - ✓ **Strengths** – Are you strong in languages, science, social sciences, creative subjects, practical skills?
-

A note about your background

Having roots in El Salvador and being fluent in Danish gives you unique strengths — maybe consider paths where languages, culture, or international relations could be useful (e.g. HHX, STX with language focus). Your multicultural background is a real asset!

Recommendation

Since I don't know your specific interests yet, here's a general suggestion:

- If you want to keep **many doors open**: STX or EUX.
 - If you love **technology or science**: HTX.
 - If you like **business or economics**: HHX.
 - If you want to start **working sooner** or like practical work: EUD or EUX.
 - If you want to **take a little more time**: 10th grade to reflect and build skills.
-

What's next?

 I can help you explore specific programs, schools in your area, or even help with a self-assessment of your interests if you'd like!

Would you like to tell me a bit more about:

- Your favorite subjects?
- What kind of work or activities you enjoy?
- If you're considering university or would prefer to start working sooner?

That way I can give you an even more personalized recommendation. 😊
