

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from El Salvador. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and important question—well done for considering your options carefully at this stage! Let's break it down a bit so I can give you helpful recommendations tailored to your situation.

🎓 Educational paths after primary school in Denmark

Since you just finished *folkeskolen* (primary and lower secondary school), here are the main options available:

1 Gymnasiale uddannelser (Upper secondary school - academic focus)

These prepare you for university or other higher education. Main types:

- **STX (studentereksamen)** – general upper secondary, broad academic subjects.
- **HHX (højere handelseksamen)** – focus on business, economics, and languages.
- **HTX (højere teknisk eksamen)** – focus on technology, science, and technical subjects.
- **HF (højere forberedelseseksamen)** – shorter (2 years), more flexible, for students who may want a less traditional academic path.

👉 When to choose this?

If you enjoy academic subjects and think you might want to go to university or professional higher education afterwards.

2 Erhvervsuddannelser (Vocational education and training - VET)

These combine school and apprenticeship in a company, preparing you for a skilled trade or profession (e.g. electrician, carpenter, hairdresser, IT support, cook).

👉 When to choose this?

If you like hands-on learning and want to start working in a skilled job relatively soon, while still keeping doors open for further education (e.g. erhvervsakademi).

3 Kombinerede forløb / EUD+gymnasial (eux)

A mix of vocational training and upper secondary education, giving you both a trade qualification *and* access to higher education.

👉 When to choose this?

If you want practical skills *and* the option for university later.

☀️ How to decide?

Here are some good reflection points for you:

- ✓ What subjects do you enjoy most? (science, business, languages, creative arts, technology?)
 - ✓ Do you prefer classroom learning, hands-on work, or a mix?
 - ✓ Are you thinking about university, or would you rather start a career sooner?
 - ✓ Do you want to study abroad one day, or stay in Denmark?
-

✨ Personalized recommendation

Since you're fluent in Danish, born in Denmark, and likely familiar with the system:

👉 **If you enjoy academic subjects and want to keep many doors open:**

Consider **STX** (broadest) or **HHX** (if you're interested in business/economics).

👉 **If you prefer technology or natural sciences:**

HTX is a great choice.

👉 **If you want practical experience and a faster path to work (but still options for further study):**

Look at **EUX** – you get a vocational qualification + study skills for higher education.

🌍 Other considerations

💡 With your Salvadoran background, strong language skills (Danish, maybe Spanish, English) could be a huge advantage. International business, languages, or cultural studies might suit you if that interests you!

💡 Denmark also offers good guidance resources — consider talking to your *UU-vejleder* (youth guidance counselor) to explore programs near you.

If you tell me more about your interests (e.g. favorite subjects, hobbies, dream jobs), I can give a more specific suggestion! Would you like that? 😊
