

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Equatorial Guinea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that gives a great foundation to help guide you! Since you've just completed primary school in Denmark (which typically finishes around age 15-16), you're now at a key decision point. Let's break down your options and what you might consider, depending on your interests, strengths, and long-term goals.

Your main options after primary/lower secondary school (Folkeskole) in Denmark

Since you're 16, the next typical educational steps are:

1 General upper secondary education

- **STX (Studentereksamen)** – A broad, academic program preparing you for university.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and international trade.
- **HTX (Higher Technical Examination)** – Focus on technology, science, and engineering.
- **IB (International Baccalaureate)** – An international academic program (usually taught in English), also accepted at universities worldwide.

✓ Choose this if:

You enjoy academic subjects, think you might want to go to university, and want to keep your options open.

2 Vocational education and training (EUD / EUX)

- **EUD** – Apprenticeship-based education, combining school with practical training in a workplace (e.g. crafts, technology, health care, hospitality).
- **EUX** – Combines vocational training with an upper secondary academic level, so you can both get a trade qualification and access to higher education.

✓ Choose this if:

You like practical learning, want to enter the job market faster, or want both hands-on skills and the possibility of university later.

3 Other paths

- **10th grade (10. klasse)** – A transitional year if you feel unsure about your next step and want to strengthen your skills.
- **Efterskole** – A one-year boarding school that combines education and personal development (can be great for meeting new friends, developing independence).

 Choose this if:

You feel like you need more time to decide or want a year to grow personally while still learning.

 Questions to help you choose

Ask yourself:

- Do I enjoy academic work (reading, writing, theoretical subjects), or do I prefer practical tasks?
- Am I interested in areas like science, business, technology, languages, art, or something else?
- Do I want to go to university later, or would I rather work and learn at the same time?
- Would I like an international option (e.g. IB) that connects me with opportunities outside Denmark too?

 My general recommendation

Since you're fluent in Danish, born and raised in Denmark, and probably know the system well — but also have roots in Equatorial Guinea — you might:

 **Consider STX or IB** if you want to keep your options open for university (in Denmark or abroad).

 **Consider HHX or HTX** if you have clear interests in business or technology.

 **Consider EUX** if you like practical learning but still want the option of higher education.

If you're not sure yet, **10th grade or an efterskole year** could be a great way to explore more and gain clarity.

 Final tip

It can help to visit some schools, attend open house events ("åbent hus"), or talk to a guidance counselor ("UU-vejleder") at your current school. They can provide personalized advice.

If you want, tell me:

- What subjects do you enjoy most?
- Do you have ideas about what job or career you might want in the future?

I can then suggest more tailored options!
