

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Eritrea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that about yourself — it sounds like you're at an exciting turning point! In Denmark, after finishing *folkeskole* (primary and lower secondary school), you have several educational options. The right path depends on your interests, strengths, and future goals. Let's look at the main options and some guidance for choosing:

Main educational paths after folkeskole

1 Gymnasiale uddannelser (Upper secondary education) – If you're interested in academic studies and possibly university later:

- **STX (Studentereksamen)** – broad academic focus (sciences, humanities, social sciences, arts).
- **HHX (Higher Commercial Examination)** – focus on business, economics, marketing.
- **HTX (Higher Technical Examination)** – focus on technology, natural sciences, engineering.
- **HF (Higher Preparatory Examination)** – shorter (2 years), more direct route to higher education.

✓ Good for: If you enjoy school subjects and want to keep many doors open, e.g. for university or higher professional studies.

2 Erhvervsuddannelser (Vocational education and training - EUD) – Learn a trade or profession:

- Combines school and apprenticeship/workplace training.
- Wide options: carpenter, electrician, chef, healthcare assistant, IT support, hairdresser, etc.

✓ Good for: If you prefer hands-on learning, want to enter the job market earlier, or learn a specific profession.

3 Kombinerede veje (e.g. EUX) – Mix of vocational and academic:

- EUX allows you to get both a vocational qualification *and* the academic level needed for university.

✓ Good for: If you want job skills *and* keep the option for higher education.

Questions to reflect on

- Do you enjoy academic subjects and exams, or do you prefer practical, hands-on work?

- Are there careers that interest you already (e.g. doctor, engineer, chef, entrepreneur)?
 - Do you see yourself going to university?
 - What subjects did you enjoy most in school?
 - How do you like to learn: theory, practice, or a mix?
-

🌟 My recommendation

Since you're fluent in Danish and have completed folkeskole:

- If you're unsure: **STX** or **EUX** would be good choices because they keep many doors open.
 - If you like technical/science subjects: **HTX** is a great option.
 - If you're drawn to business or entrepreneurship: **HHX** could suit you.
 - If you want to work and learn a trade: **EUD** or **EUX**.
-

📌 Next steps

- ✓ Talk to a **study counselor (studievejleder)** at your school or local *ungdomsuddannelse* center — they can guide you based on your interests and strengths.
- ✓ Consider visiting **open house events** at gymnasier or vocational schools.
- ✓ Try job shadowing (brobygning) or internships to see what different jobs are like.

If you'd like, tell me about your favorite subjects, hobbies, or career ideas — I can help narrow down your options further! 🚀
