

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Estonia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing your background! It sounds like you're at an exciting crossroads. Let's break it down so I can help you think through your options.

📌 Education structure in Denmark after primary school

Since you just finished *folkeskole* (primary/lower secondary school), your next step is usually:

1 **Upper secondary education (ungdomsuddannelse)** — lasts about 2-4 years, depending on the type

2 **Vocational education and training (EUD / erhvervsuddannelse)** — combines school and apprenticeship

🇩🇰 Typical upper secondary options

Here's an overview of the main types of education paths:

Path	What it's for	Duration	Leads to
STX (gymnasium)	General academic focus, broad subjects (sciences, humanities, social sciences)	3 years	University or other higher education
HHX	Business and economics focus	3 years	University or business schools
HTX	Technical, science, and technology focus	3 years	University or tech/engineering programs
HF	More practical/theoretical mix, often for students who want a shorter route	2 years	University or specific higher ed (usually with a more targeted aim)
EUD / EUX	Vocational training, with or without a high-school level exam	2-5 years	Skilled trades, or university via EUX

💡 Questions to reflect on

Here's how you can narrow it down:

- ✅ Do you enjoy academic subjects (math, languages, science, history)? → STX, HHX, HTX
- ✅ Are you more interested in hands-on learning and a job after school? → EUD
- ✅ Do you want both a trade and the chance to go to university later? → EUX
- ✅ Are you passionate about business or economics? → HHX
- ✅ Do you love tech, engineering, or design? → HTX

Special considerations

Since you speak Danish fluently and have a multicultural background, you could also:

- Choose a program that offers international options (e.g., IB at some gymnasiums, or language-heavy STX)
 - Consider language studies or international business (useful with Estonian + Danish background)
-

My recommendation

- **If you're unsure and want to keep all doors open:** STX is a safe and flexible choice.
 - **If you love business/economics:** HHX could be great.
 - **If you're into tech/science:** HTX might be ideal.
 - **If you want to work sooner or like practical work:** Explore EUD/EUX in a field you're curious about (IT, design, mechanics, culinary arts, etc).
-

 **If you tell me more about your interests (e.g., favorite school subjects, hobbies, or dream jobs), I can help you choose a more tailored path!** Would you like help thinking about that?
