

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Eswatini. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next step! Since you just finished primary school in Denmark (which usually means you completed *folkeskole* up to 9th or 10th grade), you have several good options ahead. Let me break down some typical paths and give recommendations depending on your interests, strengths, and future ambitions:

Main educational options after primary school in Denmark

Gymnasium (STX)

- A 3-year general upper secondary school with focus on academic subjects (science, social sciences, languages, arts).
- Prepares you for university.
- Good if you like subjects like math, science, history, languages, or want to keep many doors open.

HHX (Higher Commercial Examination)

- Focus on business, economics, international trade.
- Strong choice if you're interested in commerce, entrepreneurship, or marketing.

HTX (Higher Technical Examination)

- Focus on technology, natural sciences, IT.
- Great if you enjoy engineering, IT, natural sciences.

HF (Higher Preparatory Examination)

- A 2-year option (can follow after 10th grade) that also leads to higher education but is a bit more practically oriented.
- Sometimes chosen by those who want a faster route to further education or who prefer a different learning style.

EUD / EUX (Vocational Education and Training)

- Combines school and apprenticeship (hands-on).
- EUX combines vocational training with general upper secondary subjects, so you can go to university too.

- Excellent if you prefer practical work or want to learn a trade (e.g., electrician, carpenter, hairdresser, chef).

How to choose?

Since you're fluent in Danish and born/raised in Denmark, all these paths are open to you. Think about:

-  **What subjects excite you?**
-  **Do you prefer academic study or practical work?**
-  **Do you want to go to university later or start working earlier?**
-  **Do you want international opportunities (business, technology)?**

My recommendation (based on what you've shared)

Since you're 16 and just finished primary school:

 **If you're unsure and want to keep options open:** STX is a solid choice, as it gives a broad education and keeps all university options open.

 **If you're drawn to business, economics, or international trade (maybe connecting Denmark and Eswatini someday?):** Consider HHX.

 **If you like technology, science, or engineering:** HTX could be perfect.

 **If you want to work sooner or like hands-on learning:** EUD or EUX can be excellent, especially EUX if you want the option of higher education later.

Other tips

- Many schools offer *introduction programs* or open house events — visit them to get a feel!
- Talk to a *UU-vejleder* (youth guidance counselor) — they can help match your interests with options.
- Think about your hobbies, talents, and long-term dreams — they can point the way.

If you'd like, tell me a bit more about:

- What subjects you enjoy most?
- What kind of job or career you imagine?
- Do you prefer theory or practice?

Then I can give you a more tailored suggestion!
