

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Eswatini. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing about your background — it's great that you're thinking carefully about your next step! In Denmark, after completing primary school (folkeskole), you have several educational paths depending on your interests, strengths, and future goals. Let's break it down so you can think through what fits you best:

🎓 Main educational paths after primary school

Here are the most common options in Denmark:

1 Gymnasiale uddannelser (General upper secondary education)

These are good if you want to go on to university or higher education later:

- **STX (Alment gymnasium):** Broad academic focus — humanities, social sciences, natural sciences.
- **HHX (Handelssgymnasium):** Focus on business, economics, international trade.
- **HTX (Teknisk gymnasium):** Emphasis on technology, science, IT.
- **HF (Højere forberedelseseksamen):** 2-year general programme, often chosen by students who want a shorter route to higher education.

👉 *Recommended if you enjoy academic subjects and see yourself at university later.*

2 Erhvervsuddannelser (Vocational education and training)

A mix of school and apprenticeship (praktik) at a workplace. You can train for a trade or profession — e.g. electrician, chef, carpenter, hairdresser, health assistant.

👉 *Recommended if you like learning by doing, and want to work in a skilled trade or practical job after school.*

3 Kombinerede forløb / EUX (Vocational + gymnasium combined)

This lets you get both a vocational qualification and a study-qualifying exam, so you can work in a trade or go on to higher education.

👉 *Good choice if you want both options open.*

🔑 Questions to ask yourself

- Do I enjoy academic learning, or do I prefer hands-on/practical work?

- Do I see myself going to university or working soon after school?
 - What subjects excite me — languages, business, science, technology, art, health, etc.?
 - Where do I feel I can use my strengths best?
-

☀ Other considerations

- ✓ **You're fluent in Danish** — that's a big advantage!
 - ✓ **Your cultural background** — your experience could open doors for studies or careers related to international relations, languages, global business, or development work if that interests you.
 - ✓ **You can also explore 10th grade (10. klasse)** — if you want more time to decide, some choose an extra year to mature academically or socially, or to improve grades before gymnasium/vocational education.
-

📝 My advice

If you like school subjects and are considering university later → **STX, HHX or HTX** (depending on what subjects interest you most).

If you're more practical or want to start working sooner → **Erhvervsuddannelse** or **EUX**.

If you're unsure → **10th grade** could give you breathing room.

💡 **Tip:** Many schools offer open house events or orientation days — visit a few and see what feels right!

👉 **If you tell me more about your interests (e.g. do you like science, business, arts, working with people?), I can give you a more tailored recommendation!**
