

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ethiopia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question — and it's fantastic that you're already considering your next steps so carefully! Since you just finished **primary school (folkeskole)** at 16, you're at a crossroads where there are several educational paths you can choose in Denmark. Let's break it down so you can reflect on what might fit you best.

🎓 Your Options After Primary School in Denmark

Here are the main types of upper secondary education (ungdomsuddannelser):

1 General upper secondary education (for academic studies)

If you want to pursue university studies later, these are great options:

- **STX (Almen studentereksamen):** Broad focus on sciences, humanities, social sciences, languages.
- **HHX (Højere handelseksamen):** Focus on business, economics, international trade.
- **HTX (Højere teknisk eksamen):** Focus on technology, natural sciences, IT.
- **HF (Højere forberedelseseksamen):** A 2-year, more practice-oriented program — good if you prefer smaller groups or didn't love the traditional school environment.

2 Vocational education and training (erhvervsuddannelser, EUD)

- Combines school and apprenticeship in a company. You can become e.g. carpenter, electrician, chef, hairdresser, IT supporter.
- Great if you prefer practical, hands-on learning and want to start working earlier.

😞 How to choose?

Here are some questions that can help guide your decision:

- ✓ Do you enjoy academic subjects (e.g. maths, languages, science) and want to go to university? → STX, HHX, HTX, or HF
- ✓ Do you like working with your hands, creating things, or learning by doing? → EUD
- ✓ Are you interested in business, marketing, or international trade? → HHX
- ✓ Are you passionate about technology, science, or engineering? → HTX
- ✓ Do you want to keep your options open because you're unsure? → STX (broadest choice)

Special considerations

Since you have a multicultural background:

- You could consider language-rich programs (STX often offers strong language programs — could be valuable for international opportunities).
- Some schools have special focus areas (e.g. international lines, global studies, bilingual programs).
- You might also look into **IB (International Baccalaureate)** if you're considering university abroad later — offered at some gymnasier in Denmark.

Next steps

👉 **Visit open house events (åbent hus)** at local gymnasier or vocational schools to see what feels right.

👉 **Talk to a guidance counselor (studievejleder)** — they can help you map your strengths and interests.

👉 **Try bridge-building programs (brobygning)** where you can visit schools for a few days.

If you tell me:

- What subjects you enjoy most?
- Whether you prefer practical or theoretical learning?
- If you're thinking about university?

... I can give you an even more tailored recommendation! 🚀
