

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Fiji. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's thoughtful of you to consider your next step carefully! Since you're 16, living in Denmark, and have just finished primary school (I assume you mean **folkeskole** or similar), you have several good options depending on your interests, strengths, and future goals. Let's break it down:

Main educational paths after primary school in Denmark

After folkeskole, young people in Denmark typically choose between:

Gymnasiale uddannelser (General upper secondary education)

- **STX (studentereksamen)** – general upper secondary education with a broad academic focus (good if you want to go to university later).
- **HHX (higher commercial exam)** – focuses on business, economics, and international subjects.
- **HTX (higher technical exam)** – focuses on technology, science, IT.
- **HF (higher preparatory exam)** – a shorter 2-year general program, more direct path to certain higher educations.

Erhvervsuddannelser (Vocational education and training / VET)

- Combines school with apprenticeship/traineeship (praktik) in a company.
- You can train to become anything from a carpenter, chef, electrician, to healthcare assistant.
- Good if you like practical learning and want to work earlier.

Combination programs

- **EUX** – combines vocational training with gymnasium-level academic courses, so you get both a trade and qualification for higher education.

Questions to ask yourself

- Do you enjoy academic subjects and want to study at university later? → **STX, HHX, HTX, or HF** could be good.
- Do you prefer practical, hands-on learning and want to enter the workforce sooner? → **VET (Erhvervsuddannelse)** might fit.
- Are you interested in combining both? → **EUX** could give you flexibility.

Special considerations for you

Since you're fluent in Danish, you can choose freely without language barriers. Also, your background (with Fijian roots) could make international subjects (like in **HHX**) interesting if you want to work globally or in multicultural settings.

If you're interested in technology or science → **HTX**

If you like business, languages, or economics → **HHX**

If you want broad academic options → **STX**

If you want a shorter program → **HF**

If you want hands-on work and a faster path to a job → **VET / EUX**

My recommendation

✓ **If you're not sure yet:** STX is the most flexible and keeps most doors open for higher education.

✓ **If you have a clear interest in business/tech:** consider HHX or HTX.

✓ **If you want to work with your hands and earn earlier:** look into VET or EUX — and remember, EUX keeps university doors open.

Next step

I suggest:

- Talk to your school's educational counselor (uddannelsesvejleder) — they can guide you based on your grades, interests, and personality.
- Attend **uddannelsesmesser (education fairs)** or visit schools to get a feel for the programs.
- Try "brobygning" (short introductory courses) — you can test different types of education before deciding.

If you tell me more about your interests (e.g. Do you like science? Art? Business? Working with people?), I can help narrow it down even more!
