

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Finland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're thinking carefully about your next step! Since you're 16, living in Denmark, and just finished primary school (which I take to mean **folkeskole**, usually completed around age 15-16), you have several options in the Danish education system. Let's break them down and think about what might fit you best:

🎓 Your main options after folkeskole

1 Gymnasiale uddannelser (General upper secondary education)

If you want to keep your options open for higher education (university or other advanced studies later), you can choose:

- **STX** (Studentereksamen): Broad, academic focus with humanities, science, and social science.
- **HHX** (Higher commercial exam): Focus on business, economics, and marketing.
- **HTX** (Higher technical exam): Focus on technology, natural sciences, and IT.
- **HF** (Higher preparatory exam): Shorter (2 years), often more practical, good if you prefer fewer subjects and more project work.

👉 *Good if:* You enjoy academic subjects, want to go to university, or are still figuring out your interests.

2 Erhvervsuddannelser (Vocational education and training / EUD)

Combines school and apprenticeship (praktik) in a company. You can train for a trade (e.g. carpenter, chef, electrician, hairdresser, IT-support).

👉 *Good if:* You prefer practical learning, want to start working sooner, and like hands-on tasks.

3 Kombinationsuddannelser

- **EUX**: A combination of vocational training and general upper secondary exam — lets you get both a skilled trade and qualify for university.

👉 *Good if:* You want a trade but also want to keep the door open for higher education.

💡 Things to consider

✅ **Your interests** — Do you prefer theory or practice? Science, business, technology, languages, arts?

- ✓ **Your learning style** — Do you like classroom learning, or do you thrive when working with your hands?
- ✓ **Future goals** — Do you already know if you want to go to university? Or start a job/apprenticeship earlier?
- ✓ **Languages and background** — Being fluent in Danish and having Finnish roots could also open interesting options, like international studies or language-focused programs.

☀️ My suggestion

Since you're fluent in Danish and have just finished folkeskole:

- **If you like academic subjects and want to keep doors open for university** → Consider **STX**, **HTX**, or **HHX**, depending on your interest (STX = broad, HTX = tech/science, HHX = business/economics).
- **If you like practical learning and want a faster path to a job** → Consider **EUD** or **EUX** (so you can get both a trade and higher education access).

Next steps

- ☞ Talk to a **UU-vejleder (youth guidance counselor)** — they can help you explore programs and even visit schools or try short internships.
- ☞ Visit open house days (**introdage**) at local gymnasiums or vocational schools to see what feels right.
- ☞ If you want, tell me more about:
 - What subjects or activities you enjoy most?
 - Do you already have an idea of a job or career you're dreaming about?

I can then help you refine a more specific recommendation! 🚀
