

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Finland. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's thoughtful of you to reflect on your next steps! Let's break it down so you can make an informed choice.

📌 Typical educational options in Denmark after primary school

Since you've finished primary school (folkeskole), you have a few common paths to consider:

1 Gymnasiale uddannelser (Upper Secondary Education – academic)

If you're interested in continuing to university later, these are good options:

- **STX (Almen gymnasium)** – general upper secondary education with a broad mix of subjects (humanities, sciences, social sciences, languages).
- **HHX (Handelsgymnasium)** – focus on business, economics, and languages.
- **HTX (Teknisk gymnasium)** – focus on science, technology, and engineering.
- **IB (International Baccalaureate)** – international program (if you want something global, taught in English).

2 Erhvervsuddannelser (Vocational education and training / EUD)

If you'd rather combine school and practical work (apprenticeship), you could enter a vocational program to become e.g. a carpenter, chef, IT supporter, electrician, or other skilled trades.

3 Kombineret forløb / eux

If you want a vocational education *and* the possibility to go to university later, the **EUX** combines both vocational training and academic subjects.

📌 How to decide?

Ask yourself:

- ✓ Do I enjoy academic studies and want to go to university? → STX, HHX, HTX, IB
- ✓ Do I want hands-on experience and start working sooner? → EUD
- ✓ Do I want both options open? → EUX
- ✓ Do I have a particular passion (e.g. science, business, creative arts)? → Let that guide your choice of gymnasium or vocational field.

📌 Other things to consider

- Since you have a Finnish background: would you like to study in Finland eventually? Then maybe consider a path that allows for easy transition (e.g. IB or STX).
 - Are you interested in international opportunities? → IB or HHX could be helpful.
 - Do you prefer practical work over classroom learning? → EUD or EUX.
-

My general recommendation

Since you're fluent in Danish, born in Denmark, and just finished primary school, I'd suggest:

- If you enjoy school and want to keep your options open → **STX or HTX**
 - If you're drawn to business or international work → **HHX or IB**
 - If you prefer to learn by doing → **EUX or EUD**
-

If you tell me a bit more about your interests (e.g. subjects you enjoy, hobbies, future dreams), I can give a more tailored suggestion! 😊
