

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from France. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16 and have completed primary school in Denmark, you're likely at the stage where you choose between different types of **youth education (ungdomsuddannelse)**. In Denmark, the main options are generally split between **general upper secondary education** and **vocational education and training**. Here's a breakdown to help you decide based on your interests, goals, and opportunities:

1. General Upper Secondary Education (Gymnasiale Uddannelser)

If you're interested in going to university later, this is the most common path.

Main types:

- **STX (Almen studentereksamen)** – Focuses on humanities, social sciences, and natural sciences. Very flexible.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere forberedelseseksamen)** – A shorter, 2-year program (often for those who prefer a more practical and mature environment).

Best for you if:

- You're thinking about university studies later (in Denmark or abroad).
- You enjoy academic subjects.
- You're still exploring what you want to do and want to keep your options open.

2. Vocational Education and Training (Erhvervsuddannelser – EUD)

This is a mix of school and apprenticeship. You train for a specific job (e.g., electrician, chef, carpenter, healthcare worker).

Best for you if:

- You like learning by doing.
- You want to start working earlier.
- You're interested in skilled trades or practical professions.

You can also combine EUD with general education through **EUX**, which gives you both a vocational qualification *and* access to higher education.

Bonus Thoughts Given Your Background:

- **You're bilingual** – being fluent in both Danish and French opens international opportunities.
 - **Consider international programs** – such as the **International Baccalaureate (IB)** if you like studying in English and may want to study abroad later.
 - With French heritage, you could also explore **French-speaking schools** or programs if available (e.g., Lycée Français or online options).
-

Some Questions to Ask Yourself:

- Do I want to go to university later?
 - Do I enjoy academic study or hands-on learning more?
 - Do I want to start earning and working earlier?
 - Do I want to study in Denmark, France, or another country in the future?
-

My Recommendation:

If you're unsure and want to keep your options open:

→ **STX** or **IB** are great choices. STX is the standard path and offers many directions. IB is more international and well respected.

If you're more practical and want to work earlier:

→ Consider **EUD** or **EUX** – especially if there's a specific profession you're already passionate about.

Would you like help choosing a specific program or school near you?
