

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from France. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's fantastic that you're thinking carefully about your next step! Let's break it down based on your background and options in Denmark.

Since you're 16, you've probably completed **9th or 10th grade** (Folkeskolen). After primary school in Denmark, you typically have several main educational paths to choose from:

General Upper Secondary Education (Gymnasiale uddannelser)

If you enjoy academic subjects and want to keep the door open for university:

✓ **STX (Studentereksamen)** – General upper secondary school, broad curriculum (sciences, humanities, social sciences, arts).

✓ **HHX (Higher Commercial Examination)** – Focus on business, economics, and international trade.

✓ **HTX (Higher Technical Examination)** – Focus on science, technology, and engineering.

✓ **HF (Higher Preparatory Examination)** – Shorter (2-year) program, often chosen by those who want a more practical or flexible path to higher education.

☀️ Why this could suit you:

- You are fluent in Danish, so these schools are accessible to you.
- Given your French heritage, you might enjoy combining Danish and French strengths — for example, choosing a line with foreign languages, international studies, or business (HHX might be interesting).
- These paths prepare you well for university, in Denmark or abroad.

Vocational Education and Training (EUD/Erhvervsuddannelser)

If you're more interested in practical skills and working hands-on:

✓ EUD programs combine school with paid apprenticeships in a company.

✓ Covers many trades: crafts, technology, IT, hospitality, health, etc.

☀️ Why this could suit you:

- You learn by doing, get work experience early, and can start earning during your apprenticeship.
- There are pathways to higher education later (for example, erhvervsakademi programs or even university).

International options

If you'd like to keep your French roots active or aim internationally:

- ✓ Consider the **International Baccalaureate (IB)** offered at certain Danish schools (e.g., in Copenhagen, Aarhus, or other major cities).
- ✓ Some private or international schools may offer French or bilingual options.

☀️ Why this could suit you:

- The IB or international programs are recognized worldwide and could make it easier if you decide to study or work in France (or elsewhere) later.

❓ How to decide?

- ✓ Think about what subjects you enjoy most — maths, languages, sciences, arts, business, practical work?
- ✓ Consider if you'd like to go to university eventually, or start working sooner.
- ✓ Visit open house days ("Åbent Hus") at schools you're interested in.
- ✓ Talk to a guidance counselor (UU-vejleder) — they can help match your interests to programs.

👉 Example path:

- If you enjoy languages, culture, or humanities → STX with a focus on languages (Danish, French, English).
- If you like business and global trade → HHX.
- If you want to build or create things → HTX or a vocational program in technology or design.
- If you're thinking internationally → IB or international line.

If you tell me more about your interests (e.g., favorite subjects, hobbies, career ideas), I can give you a more tailored suggestion! 🚀
