

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Gabon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and important question — and it's wonderful that you're thinking carefully about your next steps! Since you're 16, fluent in Danish, and have completed primary school in Denmark (I assume you mean *folkeskole* or similar), let's break down your options and what might suit you depending on your interests, strengths, and goals.

Your educational options after primary school in Denmark

At this point, you typically choose between **general upper secondary education** (*gymnasiale uddannelser*) or **vocational education and training (VET)** (*erhvervsuddannelse*). Here's a quick overview:

1 General upper secondary education (Gymnasiale uddannelser)

If you enjoy academic subjects and might want to go to university later:

- **STX (Alment gymnasium)** → Broad academic program with languages, science, social studies, etc.
- **HHX (Handelssgymnasium)** → Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** → Focus on technology, science, and innovation.
- **HF (Højere forberedelseseksamen)** → Shorter, 2-year general upper secondary program (usually for those who want a faster path to further education or didn't follow the traditional path).

✓ Good for you if:

- You like school subjects (languages, science, social studies).
- You might want to go to university.
- You're curious about broad academic learning.

2 Vocational education and training (Erhvervsuddannelse / EUD)

If you want a more hands-on, practical education that prepares you for a job or apprenticeship:

- Programs combine school + apprenticeship in companies.
- You can become, e.g., electrician, carpenter, hairdresser, chef, social and health assistant (*SOSU*), IT supporter, etc.

✓ *Good for you if:*

- You want to work with your hands, in practice-oriented jobs.
- You want to earn while you learn (during apprenticeship).
- You prefer practical over academic learning.

3 Combined options

- **EUX** → Combines vocational training with a gymnasium-level education, so you can both get a trade and qualify for university later.

✓ *Good for you if:*

- You want both practical skills and the possibility of higher education.

What to consider when choosing

Ask yourself:

- What subjects do I like most? (math, languages, science, technology, social studies, arts?)
- Do I enjoy theory and academic work, or do I prefer practical tasks?
- Do I want to go to university, or would I like to start working after school?
- Would I enjoy working with people, technology, business, or crafts?

Your unique background

Your background as a Danish-Gabonese person might also give you:

- Interest in international perspectives, culture, languages → HHX or STX could fit well.
- A chance to bring diverse experiences into areas like social work, teaching, health, business, or international relations.

My suggestion

Since you are still exploring:

- 👉 **Visit open house events** (*åbent hus*) at your local gymnasiums and vocational schools.
- 👉 **Talk to a guidance counselor** (*studievejleder*) — they can help match your interests with a program.
- 👉 **Consider STX or HHX** if you like academic learning and want to keep your options open for university.
- 👉 **Consider EUX or EUD** if you're drawn to a particular craft, trade, or hands-on work but still want the option for higher education.

💡 *If you want, you can tell me more about your favorite subjects or dream jobs, and I can help you narrow it down further!*

Would you like help exploring specific programs or schools near where you live? 😊
