

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Gabon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful question, and it's great that you're considering your options carefully! Let's break it down so you can make a choice that fits your interests, strengths, and goals.

The Danish education system after primary school

At 16, you've likely finished **folkeskole**, so here are the common next steps:

Gymnasiale uddannelser (General upper secondary education)

These prepare you for higher education (university or similar):

- **STX (Alment gymnasium)** – broad academic subjects, good if you enjoy humanities, sciences, social sciences.
- **HHX (Handelsskole)** – focus on business, economics, marketing.
- **HTX (Teknisk gymnasium)** – focus on technology, science, engineering.
- **HF** – shorter program (2 years), more practical, often chosen by those who prefer fewer subjects or want a quicker path to higher education.

Erhvervsuddannelse (Vocational education and training, EUD)

This combines school and apprenticeship (praktik) in a company. You learn a trade and can work directly after (e.g., carpenter, hairdresser, IT support). You can also take an **EUX** where you get both a vocational qualification and a general upper secondary diploma — this keeps doors open for university.

What should guide your choice?

Your interests:

- Do you enjoy academic subjects like languages, history, math, science? → Consider **STX, HTX, HHX**
- Do you want to learn a practical skill and start working sooner, or mix study and work? → **EUD** or **EUX**

Your long-term goal:

- University? → Gymnasiale programs (STX, HTX, HHX, HF, EUX)
- A profession after a few years? → EUD

Your strengths:

- Strong academically and enjoy schoolwork? → STX, HTX, HHX
 - Prefer hands-on learning? → EUD, EUX
-

☀️ Other factors to consider

- **Location:** What's available near you?
 - **Social environment:** Do you want a big school, smaller classes, a specific focus?
 - **Future flexibility:** STX, HTX, HHX, EUX keep most doors open if you're unsure.
-

My recommendation

Since you're fluent in Danish, have completed folkeskole, and are reflecting carefully:

➡️ If you like academics and want to keep as many options open as possible:

Consider **STX** or **HTX** — both give you broad access to higher education later, in Denmark or abroad.

➡️ If you're drawn to business or entrepreneurship:

Consider **HHX**

➡️ If you want to work sooner but still want the chance to go to university:

Consider **EUX**

If you'd like, tell me:

👉 What subjects do you enjoy most?

👉 Do you see yourself at university one day, or working sooner?

Then I can give a more tailored suggestion! 🚀
