

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Gambia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself! It's great that you're thinking carefully about your next step. In Denmark, after completing primary school (folkeskole), you have several good educational options depending on your interests, strengths, and future ambitions. I'll break down your main pathways and give you some guidance to help you reflect on what could suit you:

🎓 General Upper Secondary Education (Gymnasiale uddannelser)

If you enjoy academic subjects and might want to go to university later, this is a strong choice.

- **STX (Studentereksamen):** A broad, academically-focused program with subjects like Danish, English, history, science, and social studies. Good for keeping doors open if you're not sure what you want to study at university yet.
- **HHX (Higher Commercial Examination):** Focuses on business, economics, international relations, and languages. Great if you're interested in trade, marketing, management, or entrepreneurship.
- **HTX (Higher Technical Examination):** Emphasis on science, technology, and innovation. Ideal if you like engineering, IT, or natural sciences.
- **HF (Higher Preparatory Examination):** A shorter (2-year) program that's more practical and often chosen by students who want a quicker path to higher education or need a fresh start.

🔧 Vocational Education and Training (EUD/Erhvervsuddannelse)

If you like working hands-on, creating things, or learning through practice, this path leads to skilled professions (e.g. electrician, carpenter, chef, health care worker, IT technician).

- You often split your time between school and apprenticeship with a company (praktik).
- After finishing, you can work directly or continue into higher education (e.g. erhvervsakademi).

☀️ Other possibilities

- **Kombineret ungdomsuddannelse (KUU):** A flexible program for young people who aren't sure what they want or need extra support finding their way.
- **International or bilingual programs:** Since you're fluent in Danish and have Gambian heritage, maybe an international angle could interest you?

? How to choose

Think about:

- ✓ What subjects do I like most?
- ✓ Do I learn best through books and theory or by doing practical work?
- ✓ Do I dream of going to university, or would I prefer to get a profession sooner?
- ✓ Are there role models or careers I admire?

It might also help to:

- Visit open house events (åbent hus) at gymnasier or erhvervsskoler.
- Talk to a **UU-vejleder** (youth guidance counselor) at your school or local municipality.
- Try a **brobygning** (intro course) to test a school or training.

✨ My recommendation (based on what you've shared)

Since you've completed primary school and are fluent in Danish, and if you enjoy academic learning and want to keep many options open, **STX** or **HHX** could be great starting points. If you're curious about business or international topics (and possibly connecting with your Gambian roots in global contexts), HHX might be especially interesting. But if you prefer working with your hands and getting out into the working world sooner, an **EUD** path could be very rewarding too.

If you'd like, you can tell me:

- 👉 What are your favorite subjects or hobbies?
- 👉 Do you prefer theory, practice, or a mix?
- 👉 Do you see yourself going to university one day?

And I can help narrow it down further! 😊
