

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Gambia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that really helps me give you a thoughtful answer! Since you're 16, living in Denmark, fluent in Danish, and have just completed primary school (I assume you mean *folkeskole*, or perhaps *9. klasse* or *10. klasse*), you're at a great point to choose the next step that fits both your interests and your future goals.

Here's a clear overview of your options in Denmark, along with some guidance based on different directions you might want to go:

🎒 Upper secondary education (ungdomsuddannelse)

1 General upper secondary education (if you want more academic studies and maybe university later)

- **STX (studentereksamen)** – Broad academic program with science, language, and cultural subjects. Good if you want to keep many options open.
- **HHX (higher commercial examination)** – Focus on business, economics, marketing, and languages.
- **HTX (higher technical examination)** – Focus on technology, science, and innovation.
- **HF (higher preparatory examination)** – A 2-year academic program, often for students who prefer a more practical/shorter route to higher education.

👉 *Best if you like school subjects, want to go to university later, and enjoy a mix of theory and practice.*

2 Vocational education and training (erhvervsuddannelse, EUD)

- Combine school with apprenticeship in a company. You learn a trade, and after graduation, you can work as a skilled worker or continue to higher education (e.g. *erhvervsakademi*).
- Examples: carpenter, electrician, social- and health worker (SOSU), chef, IT supporter, mechanic, etc.

👉 *Best if you like learning by doing, want to enter the job market earlier, or have a clear trade in mind.*

3 Combined programs (EUX)

- Mix of vocational training *and* academic courses — you get both a skilled trade and access to higher education.

👉 *Best if you want the security of a trade plus the option to go to university.*

How to choose?

✅ **Ask yourself these questions:**

- Do I like working with my hands or prefer academic subjects?
- Do I want to go to university or start working sooner?
- Do I want to work with technology, people, business, or something else?

✅ **Visit open houses / info evenings (åbent hus)** — many schools invite prospective students and parents to come and see.

✅ **Talk to your *UU-vejleder* (youth guidance counsellor)** — they can help match your interests with schools and programs.

☀️ **My suggestion (if you're unsure):**

Since you're fluent in Danish and have just finished primary school in Denmark, I would recommend considering either **STX** or **EUX** — both keep doors open:

- **STX** if you like academic studies and are curious about a broad range of subjects.
- **EUX** if you think you might want a trade but also want to leave the door open for further education.

If you tell me a bit more about your interests (e.g. do you like science, art, business, working with people, working outdoors?), I can help you narrow it down further!

Would you like help finding specific schools or programs near where you live?
