

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Georgia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself — it's great that you're thinking seriously about your future. Since you're 16, have completed primary school, and are fluent in Danish, you have a few good options available in the Danish education system. The right path for you depends on your interests, strengths, and long-term goals, but here are the main directions you can consider:

1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic programs that typically last 3 years and prepare you for university. There are several types:

- **STX (Studentereksamen)** – Broad and academic; good if you're interested in humanities, sciences, or social sciences.
- **HHX (Højere Handelseksamen)** – Focuses on business, economics, and languages. Great if you're interested in working in business or marketing.
- **HTX (Højere Teknisk Eksamen)** – Focuses on technology, natural sciences, and engineering.
- **HF (Højere Forberedelseseksamen)** – A 2-year program (sometimes 3 with preparation) that's more practical, but still allows access to higher education.

Recommended if:

You enjoy studying, want to go to university later, and aren't sure exactly what you want to do yet.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These programs combine school with practical training (apprenticeships) and usually take 2–4 years. You can become a carpenter, electrician, chef, healthcare worker, IT-supporter, etc.

- There are many "main courses" (hovedområder), such as:
 - Care, health and pedagogy
 - Technology, construction and transport
 - Food, agriculture and hospitality
 - Administration, commerce and business service

Recommended if:

You prefer hands-on work, want to start working and earning sooner, or are interested in a specific trade.

3. EUX – A Mix of Vocational and Academic

This is a great hybrid option. You get both a vocational education *and* a general upper secondary exam (like STX), so you can both work in a trade *and* go to university.

Recommended if:

You want practical skills but also want to keep your academic options open.

Choosing the Right Path

Here are a few questions to guide you:

- Do you like academic subjects (math, science, literature, etc.)? → Consider STX, HHX, or HTX.
 - Do you prefer hands-on work? → Consider EUD or EUX.
 - Are you interested in business, tech, healthcare, or creative work?
 - Would you rather start working sooner, or continue studying?
-

Tip: Embrace Your Background

Being fluent in Danish and having Georgian roots is a big advantage. You might explore international careers, language-based opportunities, or fields where cultural understanding is important (like diplomacy, social work, or tourism).

Final Advice

Talk to your school counselor (UU-vejleder), visit **open house events (Åbent Hus)** at local schools, and maybe try short internships or "brobygning" programs that let you test different educational paths. Also, don't stress — many people switch paths after they start, and Denmark's system supports that.

Would you like help narrowing things down based on your interests or future goals?
