

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Georgia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you've completed primary school and are thinking seriously about your future—this is a big and important step. Since you're 16, you're at a natural point in the Danish education system to choose between several educational paths. Here's a breakdown of your options and some guidance based on your background and interests:

🎓 Main Options After Primary School (Folkeskole) in Denmark

1. Gymnasium (STX, HHX, HTX, or HF)

These are upper secondary school programs that prepare you for university.

- **STX (Almen studentereksamen)** – General academic upper secondary school. Best if you're interested in subjects like languages, social sciences, or natural sciences.
- **HHX (Højere handelseksamen)** – Business-focused, great if you're interested in economics, marketing, or international trade.
- **HTX (Højere teknisk eksamen)** – Technical/science-focused, ideal if you like technology, IT, engineering, or science.
- **HF (Højere forberedelseksamen)** – Shorter, more practical 2-year program, good if you want to continue to higher education but don't want a 3-year gymnasium.

✅ *Best if: You want to keep your options open for university or professions that require a studentereksamen.*

2. Erhvervsuddannelse (EUD) – Vocational Education and Training

These programs prepare you for specific trades (electrician, carpenter, hairdresser, mechanic, etc.) and combine school with hands-on training (praktikplads/apprenticeship).

✅ *Best if: You want to start working sooner or prefer practical, hands-on learning.*

3. EUX – Combination of Vocational and Academic Education

Gives you both a vocational qualification and a studentereksamen-level diploma. You can work in a trade *and* apply for higher education afterward.

✅ *Best if: You want job-ready skills AND the option to go to university later.*

🎯 How to Decide What's Right for You

Here are a few questions to ask yourself:

- Do you enjoy academic subjects (math, science, languages, history)?
- Or do you prefer practical learning (working with your hands, real-world problem solving)?
- Do you have a dream job or interest area (medicine, IT, business, construction)?
- Are you thinking about university or starting work after school?

Example Paths Based on Interest:

Interest Area	Suggested Path
Business or Economics	HHX or EUX Business
Technology or Engineering	HTX or EUX Technical
Medicine or Science	STX (science line)
Practical Trades (e.g. electrician, chef)	EUD or EUX
University general access	STX or HF

As a Bilingual/Diverse Background Student:

You might also consider how your Georgian heritage and language can be a strength. For example, studying international business, languages, or diplomacy could be a great way to use both your Danish and Georgian background.

Final Thoughts

Since you're fluent in Danish and finished the Danish school system, all doors are open to you. Here's a **simple next step**:

1. **Talk to a guidance counselor (UU-vejleder)** – They can help you based on your interests and grades.
2. **Visit open house events (åbent hus)** – These give you a real feel for the schools.
3. **Take a personality/interest test** – Some sites like ug.dk can help you explore options.

Would you like help exploring careers or study programs based on your interests? I can also suggest specific schools near you if you tell me your town or region.
