

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Georgia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself! It's great that you're thinking seriously about your future already — that gives you a strong head start.

Since you've just finished primary school in Denmark (folkeskolen), you're at a key decision point where you can choose among several different education paths. The "right" path depends on your interests, strengths, and goals. I'll explain the main options in Denmark and suggest how to think about them:

Your Main Options After 9th/10th Grade in Denmark

1. **Gymnasiale Uddannelser (General Upper Secondary Education)**

These are for students who want to go to university later.

- **STX (Almen studentereksamen)**
Focus: Broad academic subjects (humanities, science, social science)
Good if: You like school subjects, enjoy theory, and are open to university later.
- **HHX (Højere handelseksamen)**
Focus: Business, economics, international trade
Good if: You're interested in business, entrepreneurship, or marketing.
- **HTX (Højere teknisk eksamen)**
Focus: Technology, science, engineering
Good if: You enjoy STEM subjects or want to work in tech/engineering.
- **HF (Højere forberedelseseksamen)**
Focus: Shorter, more practical version (2 years)
Good if: You want to go to higher education but need a shorter program.

2. **Erhvervsuddannelser (Vocational Education and Training – EUD/EGU)**

These are for students who want to work hands-on and learn a trade.

- Examples: Electrician, carpenter, chef, social and health care, mechanic, etc.
Good if: You prefer learning by doing, want a job more quickly, or are interested in a specific trade or craft.

Based on What You Said:

Since you're fluent in Danish, born in Denmark, and finished primary school, you have full access to all these options.

Because I don't know your specific interests yet, here are some **questions** to help narrow things down:

1. **Do you enjoy school and academic subjects?**

→ If yes: STX, HHX, or HTX might be good fits.

2. **Do you like working with your hands or being practical?**

→ If yes: Consider a vocational education (EUD), maybe with a tech or creative focus.

3. **Do you see yourself going to university?**

→ If yes: A gymnasial education is the path to take.

4. **Are you interested in business, technology, or science?**

→ HHX (for business), HTX (for tech/science).

 Bonus Tip — Use Your Georgian Background

- If you speak Georgian or know about the culture, this could become a **career asset** — for example in international business, diplomacy, translation, or cultural work.
- Denmark values people with multicultural skills — especially if you're fluent in both Danish and other languages.

 Suggested Next Steps:

1. **Visit a local UU-vejleder (Youth Guidance Center)** – They can help you explore schools and programs in your area.
2. **Visit schools during open house events ("Åbent Hus")** – Talk to students and teachers.
3. **Try an "brobygning" or intro course** – Short trial weeks in different schools or programs.
4. **Ask yourself what excites you** – subjects, activities, types of work.

If you tell me more about:

- What subjects you like
- If you like theory or practical work
- If you have career dreams (e.g. doctor, businessperson, carpenter, etc.)

...I can give you much more tailored advice!

Would you like to share that?
