

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Germany. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking ahead about your educational path. Since you've just finished **primary school in Denmark** (which typically ends at 9th grade, age 15-16), your next step will usually involve **youth education** (*ungdomsuddannelse*). In Denmark, you have several good options depending on your interests, strengths, and goals.

◆ Main Education Paths After Primary School in Denmark

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for **higher education (university, etc.)**.

- **STX (Almen studentereksamen)** – Broad and academic. Good for university pathways.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and engineering.
- **HF (Højere forberedelseseksamen)** – Shorter (2 years), often used by students who want a more practical approach to further education.

● Recommended if:

You enjoy academic work and think you might want to go to university later. Especially STX or HTX could be strong fits depending on your interests.

2. Erhvervsuddannelse (Vocational Education and Training - VET)

These combine school with apprenticeships and prepare you directly for specific careers, like electrician, carpenter, chef, healthcare assistant, etc.

● Recommended if:

You prefer practical, hands-on work and want to enter the job market sooner—though you can also continue to higher education via **EUX**, which combines VET with academic subjects.

3. EUX (Combination of VET and academic education)

A special program that combines vocational training with a studentereksamen (like STX), so you can **both get a profession and still qualify for university**.

● Recommended if:

You're interested in a trade/profession but want to keep your academic doors open.

Bonus: You're of German Background

Being fluent in both Danish and (likely) German gives you a **big advantage**:

- Consider schools or programs that offer **German as an A-level language**, which can improve your exam results.
- You could also look into **international programs** (like International Baccalaureate – IB), especially if you're considering studying abroad later.
- If you're near the border, some schools offer **German-Danish bilingual programs**.

Things to Consider When Choosing

- Do you like academic or hands-on/practical work?
- Are you thinking about university, or would you prefer to work sooner?
- What subjects do you enjoy the most? (Science, humanities, business, art, etc.)
- Do you want to study or work internationally in the future?

My Personal Suggestion (Based on What You've Shared)

Since you're fluent in Danish, have a German background, and just finished primary school:

If you're academically inclined:

STX or **HTX** would be excellent, depending on your subject interests. They keep your future options wide open.

If you're more practical or career-focused:

EUX is a great hybrid program that gives you a profession *and* keeps the door open for higher education.

If you'd like, I can help you explore specific schools or programs near where you live in Denmark. Just let me know your city or region and what subjects you're most interested in!
