

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Germany. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's excellent that you're already thinking carefully about your next steps. In Denmark, after finishing **primary school (folkeskole)**, you have several solid options depending on your interests, goals, and how you like to learn. I'll walk you through the main paths, and then I'll give a recommendation based on a few possible goals.

Main Educational Paths After Folkeskole in Denmark

1. Gymnasium (STX, HHX, HTX, HF)

These are upper secondary education options that prepare you for university.

- **STX (Alment Gymnasium):** Broad academic focus (humanities, sciences, social sciences). Ideal if you're not sure what you want yet or aim for university.
 - **HHX (Handelsskolen):** Focus on business, economics, and international trade. Good if you're interested in business or finance.
 - **HTX (Teknisk Gymnasium):** Focus on science, technology, and engineering. Great for future engineers, designers, or programmers.
 - **HF (Højere Forberedelseseksamen):** A shorter (2-year) option, often for more practical or personal learning paths. Often used for adults or people wanting a flexible route to university.
-  Recommended if: You're academic, want to go to university, or like school-style learning.

2. EUD – Erhvervsuddannelse (Vocational Education)

This is a mix of school and apprenticeship. You learn a trade, like:

- Electrician
- Carpenter
- Chef
- Hairdresser
- Healthcare assistant

You usually start with a **basic course (grundforløb)** and then continue with on-the-job training (praktik).

 Recommended if: You like hands-on work, want to earn while you learn, and don't necessarily want to go to university.

3. EUX – Vocational + Academic Hybrid

Combines a vocational education (EUD) with academic subjects from gymnasium. You get both a trade and qualifications to go to university later.

 Recommended if: You want the best of both worlds – job skills + university access.

4. Efterskole / 10th Grade

An optional year focused on personal growth, social development, or preparation for further education. Often includes boarding and unique themes like sports, music, or entrepreneurship.

✨ Recommended if: You want time to explore, mature, or specialize in a passion.

+ Bonus Tip: Bilingual Background

Since you speak Danish fluently and have German roots, you might consider:

- Studying in Germany in the future (especially if you're a dual citizen)
- Choosing international lines at gymnasiums or HHX programs that include German
- Looking into **IB (International Baccalaureate)** programs offered at some Danish gymnasiums

Recommendations Based on Goals

Here are a few tailored suggestions based on different interests. Let me know which fits you best, or I can help explore more.

If you're curious, academic, or unsure:

- **STX:** Very broad, good for exploring subjects and going to university.
- **International Baccalaureate (IB):** Great if you're globally minded or might study abroad.

If you're into business or want to run a company:

- **HHX:** Excellent for business, economics, marketing.
- **EUX business line:** More hands-on but still gives uni access.

If you like building, creating, or working practically:

- **HTX:** If you like tech or engineering but want a high school diploma.
- **EUX (technical or trade):** Mix of hands-on and academic.

If you're creative (design, music, media):

- STX with an arts focus, or find a gymnasium with creative electives

- Efterskole with creative themes for 10th grade
-

If you tell me more about your **interests, hobbies, or what subjects you enjoy**, I can give an even more personalized suggestion.
