

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Ghana. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking ahead about your education. Since you're 16 and just finished primary school in Denmark, you're at a key transition point. In Denmark, the typical next step after **Folkeskole** (primary and lower secondary school) is to choose between several upper secondary education paths depending on your interests, goals, and strengths. Here's a breakdown of your main options and some advice to help you choose:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These programs prepare you for university or other higher education. If you're academically inclined and want to keep your options open, these are strong choices.

Options include:

- **STX (Studentereksamen):** Focuses on a broad range of subjects including sciences, humanities, and social studies. Ideal if you're still exploring your interests.
- **HHX (Higher Commercial Examination Programme):** Focus on business, economics, and international affairs. Great if you're interested in business, marketing, or global trade.
- **HTX (Higher Technical Examination Programme):** Focuses on technical and science subjects like engineering, IT, and natural sciences.
- **HF (Higher Preparatory Examination):** A shorter, 2-year program for those who prefer a more flexible or practical route into higher education or need a second chance.

Recommended if you:

- Enjoy academic subjects
- Want to go to university
- Aren't sure yet what you want to do long-term

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are more practical and work-oriented. You combine school with apprenticeships in real workplaces.

Examples:

- Carpenter
- Electrician
- Health care worker (SOSU)

- Hairdresser
- IT-supporter
- Chef

You can also take the **EUX**, which combines a vocational education with upper secondary-level academic subjects—perfect if you want both job skills **and** the option to go to university later.

Recommended if you:

- Prefer learning by doing
- Want to start earning money sooner
- Have a clear idea of the job you want

What should you consider?

Here are some questions to help you narrow it down:

1. Do you enjoy school and academic subjects?

→ If yes, consider **STX**, **HHX**, or **HTX**.

2. Are you more hands-on and practical?

→ Then **EUD** or **EUX** could be better.

3. Do you want to go to university?

→ Go with a **gymnasial uddannelse** (especially **STX** or **HHX**), or **EUX** if you want practical skills too.

4. Do you have a passion already? (e.g., business, engineering, health, art?)

→ Choose the path that aligns with it.

My Recommendation (based on what you've told me)

Since you're fluent in Danish and just finished primary school, you likely qualify for **STX** or another gymnasium program. If you enjoy learning and want to keep your future open—maybe university in Denmark or abroad—**STX** is a strong, flexible option. If you're more interested in a trade or specific career early on, **EUX** could be a smart route: job skills + university access.

If you want, I can help you explore specific schools or programs near where you live in Denmark. Just let me know your city or region and any interests you might already have (e.g., science, business, technology, arts).
