

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Grenada. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that — you're in a really exciting stage of life with a lot of possibilities ahead! Since you just finished **primary school** in Denmark and you're 16, I want to clarify one thing first: in Denmark, primary school (folkeskole) usually ends at **9th or 10th grade**, and students are typically around 15–17 years old. So it sounds like you've either just finished 9th or 10th grade?

Assuming you've completed **9th or 10th grade**, here are your main educational paths in Denmark, along with advice to help you choose:

MAIN OPTIONS AFTER PRIMARY SCHOOL (FOLKESKOLE)

1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you're academically inclined and might want to go to university later.

Options:

- **STX** – General upper secondary school (wide focus on languages, sciences, humanities)
- **HHX** – Business-focused upper secondary education
- **HTX** – Technology- and science-focused upper secondary education
- **HF** – Shorter general education (2 years), often used for adult learners or people who want flexibility

Good if you want to:

- Go to university later
- Keep your options open
- Study subjects like science, languages, economics, social studies

2. EUD / EUX (Vocational Education and Training)

If you want practical skills and maybe start working earlier — or mix work and academics.

EUD:

- Learn a trade (e.g., carpenter, hairdresser, mechanic, chef)
- Includes apprenticeships (læreplads)

EUX:

- Combines EUD with academic subjects from gymnasium
- You get both a vocational qualification and a studentereksamen

Good if you want to:

- Learn a profession and start working quickly
- Possibly keep the door open for university later (with EUX)

3. 10. Klasse (Optional extra year)

If you feel like you need more time to figure things out, mature a bit, or improve your grades before choosing.

Good if you:

- Want to be more confident before choosing EUD or gymnasium
- Want to strengthen academic or social skills

HOW TO CHOOSE?

Ask yourself:

- **Do I enjoy school and academic subjects?** → Consider **STX**, **HTX**, **HHX**
- **Am I more hands-on and practical?** → Look into **EUD** or **EUX**
- **Do I want to work soon or continue to higher education?**
- **What are my interests?** (science, business, tech, arts, etc.)

Bonus: Cultural Strengths

Coming from a Grenadian background, you may also have unique perspectives or bilingual skills that could be valuable in:

- International business (consider **HHX** or **STX with language focus**)
- Health and care fields (EUD – social & health)
- Creative fields like media, music, or fashion (consider **EUX** or creative STX tracks)

My Personal Suggestion

Since you're fluent in Danish and just finished school, I'd recommend:

- **Go to a gymnasial education** (like **STX**, **HTX**, or **HHX**) if you enjoy learning and might want to go to university.

- If you like working with your hands or want a faster route to a job, **EUX** gives you a great mix of education and job training.

You might also want to **visit open house events (åbent hus)** at nearby schools, or **talk to an education counselor (UU-vejleder)** — they can give you local guidance and help you apply.

Would you like help comparing specific schools or programs near where you live in Denmark? I can look that up for you too.
