

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guinea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! It's great that you're thinking seriously about your next steps. Since you've just finished primary school in Denmark (folkeskolen), your next move will typically be one of several upper secondary (ungdomsuddannelse) paths. The right one for you depends on your interests, strengths, and future goals.

Here's a breakdown of your main options and what they lead to:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are 3-year programs that prepare you for university. Good if you like academic subjects and might want a future in areas like law, medicine, engineering, business, or social sciences.

- **STX (Alment Gymnasium):** Broad and academic. Good if you're not sure exactly what you want to study yet.
- **HHX (Handelsgymnasium):** Focuses on business, economics, and languages. Great for careers in business, international trade, or marketing.
- **HTX (Teknisk Gymnasium):** Focuses on science, technology, and engineering. Perfect if you're into tech, innovation, or science.
- **HF (Højere Forberedelseseksamen):** A shorter 2-year program, often for more mature students or those who want a different pace.

Choose this path if:

- You enjoy studying.
- You think you might want to go to university later.
- You like subjects like math, science, languages, or social studies.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These are 2-5-year programs that combine school and apprenticeship. You train to become, for example, a mechanic, electrician, carpenter, hairdresser, chef, or healthcare worker.

Choose this path if:

- You want to work with your hands or learn a trade.
- You prefer practical work instead of sitting in a classroom all day.
- You want to start earning money sooner.

3. EUX (Mix of Vocational and Academic)

A combination of EUD and Gymnasiale uddannelser. You learn a trade *and* get a diploma that allows you to go to university later.

Choose this path if:

- You're interested in learning a trade but also want the option to go to university later.
- You're willing to work hard (it's more demanding than EUD or STX alone).

What to consider when choosing:

- What are you interested in? (e.g., science, people, business, design, tech?)
- Do you enjoy school and studying?
- Would you rather start working sooner, or study longer?
- What careers do you imagine yourself doing?

Recommendation

Since you're fluent in Danish, born in Denmark, and just finished folkeskolen, you have **all doors open**.

If you're still unsure what you want, **STX** is often a good starting point because it keeps your options wide open for future university studies.

But if you already have a strong interest—say, in business or tech—**HHX** or **HTX** might be better suited.

And if you're more hands-on or want to learn a profession and start earning sooner, **EUD** or **EUX** is a smart and respected choice.

Would you like help figuring out what careers or subjects you might enjoy? I can guide you through that, too.
