

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guinea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that. Since you're 16, living in Denmark, fluent in Danish, and just finished primary school ("folkeskole"), you're at an important turning point. In Denmark, there are several solid paths you can take after 9th or 10th grade, depending on your interests, goals, and the kind of life you want to build.

Here's a breakdown of your main options:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you're thinking about going to university later, this is a strong path.

Types:

- **STX (Studentereksamen):** Focus on general academic subjects – good if you like languages, history, science.
- **HHX (Højere Handelseksamen):** Business and economics focus – great if you're interested in finance, marketing, or starting your own business.
- **HTX (Højere Teknisk Eksamen):** Focus on technology and science – ideal if you like IT, engineering, or science.
- **HF (Højere Forberedelseseksamen):** A shorter, 2-year program – more practice-oriented and flexible.

 *Choose this path if:*

You like studying, might want to go to university, or want more time to explore your interests.

2. Erhvervsuddannelser (Vocational Education & Training – EUD)

Hands-on education that leads directly to a job.

Examples:

- Electrician, carpenter, chef, healthcare assistant, hairdresser, mechanic, etc.

These programs often start with **Grundforløb (basic course)** followed by **praktik (apprenticeship)** in a company.

● *Choose this path if:*

You want to start working sooner, prefer practical learning, or like working with your hands.

3. EUX – The Best of Both Worlds

A combination of vocational training and academic courses, so you can **both** get a job **and** keep the door open for university later.

● *Choose this if:*

You want job skills + still want the option to study further.

What Should You Think About?

1. **Your interests** – What subjects do you enjoy? What kind of work excites you?
 2. **Your strengths** – Are you better at theory, or do you prefer doing practical things?
 3. **Your goals** – Do you want to work soon, or keep studying?
 4. **Your background** – Your bilingual and multicultural background could be a huge asset in areas like international business, healthcare, or education.
-

Examples Based on Different Interests:

- **Like business and want to help your community?** → HHX or EUX Business
 - **Like healthcare and helping others?** → EUD (social- og sundhedsassistent) or HF with a focus on healthcare
 - **Like technology or IT?** → HTX or EUX Tech
 - **Not sure yet?** → STX gives you more time to figure it out.
-

Next Steps:

1. **Talk to an educational advisor (UU-vejleder)** – They can help you plan and apply.
 2. **Visit schools on open house days (Åbent Hus)** – Get a feel for what fits you.
 3. **Try a “brobygning” (bridging course)** – You can test out different programs before choosing.
-

If you tell me a bit more about what you like (e.g., favorite subjects, hobbies, what jobs you admire), I can give more tailored advice.
