

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guinea-Bissau. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background—that helps a lot in giving you useful advice. Since you've just finished primary school in Denmark and you're 16, your next step typically falls under **youth education** ("ungdomsuddannelse"). In Denmark, there are **two main educational paths** at this stage:

1. Vocational Education and Training (EUD)

- **Focus:** Practical skills and job training.
- **Duration:** Usually 2–4 years.
- **Leads to:** Skilled jobs (e.g., electrician, hairdresser, carpenter, social and health assistant), or further education.
- **Ideal if:**
 - You prefer learning by doing.
 - You want to enter the job market fairly quickly.
 - You're interested in a specific trade or profession.

2. General Upper Secondary Education (e.g., STX, HHX, HTX, HF)

These are more academic and prepare you for higher education (e.g., university, professions like doctor, teacher, engineer, etc.).

Options:

- **STX (Studentereksamen)** – Broad general education (humanities, science, languages).
- **HHX** – Focus on business, economics, and languages.
- **HTX** – Focus on technology and natural sciences.
- **HF** – A 2-year general upper secondary education, often for those who want a shorter academic route or didn't go straight into gymnasium after 9th grade.
- **Ideal if:**
 - You're interested in going to university later.
 - You enjoy academic subjects.
 - You're not yet sure what career you want, but want to keep options open.

So... What Should *You* Do?

Here are a few questions to help decide:

- **Do you enjoy academic subjects like math, science, history, or languages?**
 - → Then **STX**, **HTX**, or **HHX** might be a good fit.
- **Are you interested in something specific, like technology, healthcare, or working with your hands?**
 - → Then look into **EUD** (e.g., SOSU for health, or mechanics, culinary arts, etc.).
- **Do you want to start earning money earlier?**
 - → Vocational education can help you enter the workforce faster.

 Tip:

Visit "**UddannelsesGuiden**" (ug.dk) – it's Denmark's official education portal. You can take quizzes and see what schools offer in your region.

📖 A Note on Background

Coming from a bicultural background (Denmark and Guinea-Bissau) can be a strength. You might bring unique perspectives and language skills. If you're bilingual or understand Portuguese or local Guinean languages, that could open doors in areas like international business, diplomacy, education, or social work.

✅ Recommendation (if you're unsure):

If you're open to academic learning and want to keep your options open, **STX** or **HHX** is a solid choice. If you're more practical or eager to start working, **EUD** (especially with a good apprenticeship) can lead to great careers with solid pay.

Let me know what your interests are, and I can give you a more specific recommendation!
