

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guinea-Bissau. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Being 16 and just finishing primary school in Denmark puts you at an important crossroads. Denmark's education system offers several good paths depending on your interests, goals, and how you prefer to learn. Here's a breakdown of your options and some guidance to help you decide:

1. Gymnasiale uddannelser (Upper Secondary Education)

This path is for you if you're considering **university in the future**.

Options include:

- **STX (Alment gymnasium):** Broad academic focus (good if you're unsure what you want yet).
- **HHX (Handelsskole):** Business, economics, and marketing.
- **HTX (Teknisk gymnasium):** Science, technology, and design.
- **HF (Højere Forberedelseseksamen):** Shorter, more practical academic path (2 years, vs. 3 years for others).

Good fit if you:

- Like school subjects and want to go to university
- Are academically oriented
- Are interested in broad career options in the future

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

If you're more **hands-on** and want to work sooner or in a skilled trade.

Examples:

- Electrician
- Mechanic
- Hairdresser
- Carpenter
- Healthcare assistant

You do part of the education at school and part in a company as an apprentice.

Good fit if you:

- Prefer learning by doing
- Want a job soon after school
- Are interested in a specific trade or profession

3. Kombinationsforløb (EUX)

The best of both worlds: combines vocational training with academic studies.

You get a **studentereksamen** (like gymnasiet) and a **faglært** (vocational) qualification.

Good fit if you:

- Want both practical skills and the option to go to university
- Aren't sure yet if you want to go to university or start working

How to Decide?

Here are some questions to ask yourself:

- Do I enjoy school and theory, or do I prefer working with my hands?
- Am I interested in going to university later?
- What subjects do I like most?
- Do I have a dream job or industry in mind (e.g., healthcare, business, tech)?
- Would I like to start earning money earlier?

Bonus Tip (about your background)

You speak fluent Danish and have a multicultural background — that's a **huge strength**. You could use it in areas like:

- International business (HHX)
- Health or social care (EUD or HF)
- Languages, diplomacy, or education (STX or HF)

My Recommendation (if you're undecided)

If you're not sure yet, a **general STX or HF program** could keep many doors open while you figure things out. But if you're excited by something practical (like fixing cars, helping people, or creating things), don't be afraid to go into **EUD or EUX** – they're respected and lead to real careers.

Would you like help choosing based on your interests (like tech, health, design, business, etc.)? I can help narrow it down further.
