

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guinea-Bissau. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that helps a lot. Since you're 16, fluent in Danish, and just finished primary school in Denmark, you're at a key point where you can shape your future with some exciting options. In Denmark, after primary school (folkeskole), most students go into one of two main paths: **youth education (ungdomsuddannelse)** – either **general upper secondary education** or **vocational education and training (VET)**. Here's a breakdown of the main paths and what might suit you:

1. General Upper Secondary Education (Alment Gymnasium / STX, HF, HTX, HHX)

These are good if you're aiming for **university** later.

- **STX (Studentereksamen):** Focuses on general academic subjects like languages, science, and humanities. Good if you enjoy school subjects and want flexibility later.
- **HHX:** Focuses on business, economics, and international trade. Great if you're into business or finance.
- **HTX:** Focuses on science and technology. Best if you like technical subjects or want to become an engineer, IT specialist, etc.
- **HF:** A bit shorter (2 years). Good for those who want a quicker route to higher education or a more practical learning style.

✓ Recommended if:

- You enjoy studying.
- You're thinking about going to university or want a broad foundation.
- You're not yet sure exactly what career you want.

2. Vocational Education and Training (Erhvervsuddannelse / EUD)

This is more hands-on, with practical training and internships. You earn money while learning.

Examples of careers through EUD:

- Electrician
- Carpenter
- Hairdresser
- Social and health worker (SOSU)
- IT technician

- Chef
- Mechanic

✓ Recommended if:

- You like learning by doing.
- You want to start working sooner (but can still go on to higher education later).
- You already have a profession in mind.

☀ Your Background – Special Considerations

Being fluent in Danish and having a multicultural background can be **a strength** in many fields like:

- **Healthcare & social work:** Denmark needs more people in these areas, and cultural understanding is a big plus.
- **Business & international trade:** Knowing two cultures can be great if you're interested in HHX/business.
- **Technology:** If you like problem-solving, tech has great opportunities with high pay and job security.

✓ My Advice:

Since you're just finishing folkeskole, take some time to reflect on:

1. **Do you like academic study or prefer hands-on learning?**
2. **Do you already have a career in mind?**
3. **Do you want to go to university later, or start working sooner?**

If you're unsure:

- **Visit educational fairs (uddannelsesmesser).**
- **Try "brobygning" (bridging programs)** – you can try out different educations.
- **Talk to a guidance counselor (studievejleder)** – they can give specific advice based on your grades and interests.

🔍 Example Pathways Based on Interests:

Interest	Path	Example Job
Healthcare, people	HF + SOSU or university	Nurse, psychologist
Technology	HTX or EUD IT	Software developer, IT technician
Business	HHX	Accountant, entrepreneur
Trades (hands-on)	EUD	Electrician, mechanic
University later, unsure now	STX	Wide range of options later

If you tell me more about your interests or dream job, I can give a more tailored recommendation.
