

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guyana. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that! At 16, you're at an important decision point, and it's great that you're thinking seriously about your next steps. Since you've completed primary school in Denmark (which likely means *folkeskole* up to 9th or 10th grade), here are your main options for education—and some guidance based on different interests and goals.

Main Educational Paths After Primary School in Denmark:

1. Gymnasiale uddannelser (General Upper Secondary Education)

This is for students who are thinking about going to university later.

Types:

- **STX (Almen studentereksamen)** – Broad academic focus (humanities, sciences, social sciences).
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and engineering.
- **HF (Højere forberedelseseksamen)** – Shorter program (2 years), often more flexible and for slightly older students or those wanting university later.

Best if you:

- Enjoy academic subjects.
- Might want to go to university.
- Are still exploring what field interests you.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

This is for students who want to enter a trade or profession more directly.

Fields include:

- Construction (e.g. carpenter, electrician)
- Health care (e.g. SOSU assistant)
- Technology and IT
- Hospitality (e.g. chef, hotel staff)

Best if you:

- Prefer hands-on work and learning through apprenticeships.
- Want to start working sooner.
- Are interested in a specific trade or skill.

3. Kombinerede forløb (EUX)

A combination of vocational training and general upper secondary education. You get both practical training and academic qualifications, giving you more flexibility.

Best if you:

- Want job-ready skills **and** the option to go to university later.
- Are ambitious and willing to take on a more demanding program.

How to Choose?

Ask Yourself:

- Do I want to go to university in the future?
- Do I enjoy academic subjects or practical/hands-on learning more?
- What subjects do I enjoy most? (Math, languages, tech, business, arts?)
- Do I want to start working earlier or study longer?

Recommendations Based on Your Background and Interests

Since you're fluent in Danish and finished school in Denmark, you have full access to the system. Also, your background from Guyana could be an asset if you're interested in **international relations, languages, cultural studies, or global business**.

Here's what I'd recommend depending on your interests:

Interest/Strength	Recommended Path
Academic + unsure about field	STX (broad and flexible)
Business or international trade	HHX
Tech, science, or engineering	HTX
Health, social care, childcare	EUD SOSU or EUX
Hands-on trades (construction, cooking, IT, etc.)	EUD or EUX
Want to keep university as an option but like practical work	EUX

Final Tips:

- **Talk to a guidance counselor** (*studievejleder*) at your school or local education center.
- **Visit education fairs** or open houses for schools near you.

- **Try internships (praktik)** if you're unsure—many schools offer short trial periods.
- **Don't stress too much** — the Danish system is flexible, and you can often change paths later.

If you'd like, I can help you look at local schools or programs near where you live. Just let me know your city or area!
