

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Guyana. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing your background — it helps a lot in giving you the most relevant advice. At 16 in Denmark, you're at a key decision point in your education. Since you've just completed primary school (what in Denmark is often called *folkeskole* up through 9th or 10th grade), your next steps will depend on your interests, strengths, and future career goals.

Here are the main educational paths available in Denmark after primary school:

## 1. Gymnasiale uddannelser (Upper Secondary Education – Academic Focus)

This path prepares you for higher education like university.

### Types:

- **STX (Studentereksamen):** Broad academic program with subjects like science, languages, and social studies.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and international relations.
- **HTX (Higher Technical Examination):** Focus on technology, IT, and science.
- **HF (Higher Preparatory Examination):** Shorter, more flexible two-year academic program (often used by students who didn't take 10th grade).

### Best if you:

- Like school and studying.
- Are aiming for university or higher education later.
- Enjoy subjects like languages, math, social science, etc.

## 2. Erhvervsuddannelser (VET – Vocational Education and Training)

This path leads to a trade or profession (e.g., electrician, chef, healthcare assistant, carpenter).

You combine school and paid work through apprenticeships (*læreplads*).

### Best if you:

- Prefer hands-on learning.
- Want to work soon and earn money.
- Are interested in practical jobs or technical trades.

You can still go to higher education later through **EUX** (a combined vocational and academic program), giving you both a trade and access to university.

---

## Choosing the Right Path for You

Here are a few key questions to ask yourself:

- Do you enjoy academic subjects and want to go to university?
  - Are you more practical and want to start working and earning sooner?
  - What subjects or fields interest you most right now?
  - Would you like to work in business, tech, health, trades, art, or something else?
- 

## My Recommendations (Based on Your Age and Background)

Since you're fluent in Danish and have just finished *folkeskole*, I'd recommend:

### ► If you're academically inclined:

- Consider **STX** or **HHX** if you're interested in going to university later.
- HHX might be especially interesting if you're drawn to international business, economics, or entrepreneurship (especially with your multicultural background).

### ► If you're practical or want job skills fast:

- Look at a **vocational education program (EUD)** in something you enjoy (e.g., IT, mechanics, health, or hospitality).
  - Consider **EUX** if you want both a trade and the option for further education later.
- 

## Final Tip

Visit a local **UU-vejleder (youth guidance counselor)** — they can help you explore options, set up company visits, or find internships. Also, visit [uddannelsesguiden.dk](https://uddannelsesguiden.dk) (UG.dk) to explore all programs in Denmark.

---

Would you like help exploring specific careers or subjects you're interested in? That can help narrow things down a lot.
