

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Haiti. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question—and it's excellent that you're thinking seriously about your future at 16. Since you've just finished primary school in Denmark, you're at a key decision point. The next steps depend a bit on your interests, strengths, and long-term goals, but I'll give you a solid overview of your main options and some guidance based on different scenarios.

## 🎓 Your Main Options After Primary School (Folkeskole)

In Denmark, after completing 9th or 10th grade, students typically choose between three main types of education:

## 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university.

### ♦ STX (Almen studentereksamen)

- **Focus:** Broad, general academic subjects (Danish, science, humanities, languages).
- **Best for you if:** You're interested in university later and enjoy academic learning.

### ♦ HHX (Højere handelseksamen)

- **Focus:** Business, economics, and international trade.
- **Best for you if:** You like business, entrepreneurship, or international work.

### ♦ HTX (Højere teknisk eksamen)

- **Focus:** Science, technology, engineering, and math (STEM).
- **Best for you if:** You're into tech, engineering, or natural sciences.

### ♦ HF (Højere forberedelseksamen)

- **Focus:** Shorter, more practical academic route (2 years).
- **Best for you if:** You want a faster way to access certain professional bachelor programs.

## 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

- Combines school and apprenticeship with a company.
- Leads to a skilled trade (electrician, hairdresser, chef, mechanic, etc.).

#### ✦ Best for you if:

- You want to **start working sooner**.
- You like **practical, hands-on work**.
- You want to learn a skill with job security.

### 3. Kombinerede forløb (EUX)

- Combines **vocational training (EUD)** with **general upper secondary education**.
- You can **learn a trade** and still be **qualified for university** afterward.

#### ✦ Best for you if:

- You want **both practical skills** and **the option to go to university**.
- You're undecided and want to keep your doors open.

#### Let's Personalize It

To help guide you better, here are a few questions. You don't need to answer all, but think about them:

1. **What subjects do you enjoy the most in school?**
2. **Do you prefer working with your hands or reading/studying?**
3. **Are you thinking about university, or do you want to start working sooner?**
4. **Do you have any dream careers (like doctor, entrepreneur, designer, IT-specialist, etc.)?**

#### My Initial Recommendation (based on what I know)

Since you're fluent in Danish, born and raised in Denmark, and have just completed primary school, you have **all options open**. Given that, and assuming you're not 100% sure yet what you want, here's a **safe and flexible path**:

- ➡ **Consider STX** if you enjoy academic learning and want time to explore your interests.
- ➡ **Consider EUX** if you're curious about having a skilled trade (like IT-support, electrician, or business) but still want the chance to go to university later.
- ➡ **Consider HHX** if you're interested in **business, marketing, economics**, or maybe even starting your own company one day (many kids of immigrants go this route and find it empowering).

Would you like me to help you compare two specific programs, or explore what you can do with your Haitian background (like international studies or global business)?
