

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Indonesia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16 and have just finished primary school (what in Denmark is typically considered *folkeskole*, up to 9th or 10th grade), your next step is important — and there are several good options depending on your interests, strengths, and long-term goals.

Here are the **main educational paths** available in Denmark after folkeskole:

🎓 1. Gymnasiale uddannelser (Upper Secondary Education)

This is the most common choice if you're considering university later on.

The main types:

- **STX (Almen studentereksamen)** – Broad academic focus (humanities, science, social studies).
- **HHX (Højere handelseksamen)** – Business, economics, marketing.
- **HTX (Højere teknisk eksamen)** – Focus on science, technology, and engineering.
- **HF (Højere forberedelseksamen)** – Shorter, 2-year academic program; good for those who want a flexible or quicker route to higher education.

✅ *Choose this if:* You enjoy academic subjects and might want to go to university or a professional bachelor's program.

🔧 2. Erhvervsuddannelser (Vocational Education & Training - EUD)

Hands-on training with a mix of school and apprenticeship at a workplace. Examples include:

- Electrician, carpenter, chef, social and health worker (SOSU), mechanic, etc.

✅ *Choose this if:* You like practical work, want to start earning sooner, or have a clear career in mind.

🧑 3. Kombineret ungdomsuddannelse (KUU)

A program for young people who are unsure about school or work. It's more flexible and helps you prepare for either work or further education.

✅ *Choose this if:* You're not sure what direction you want to go yet and need a gentler, more personal introduction to working life.

💡 So what should you choose?

Here are a few questions to help narrow it down:

- Do you enjoy school and academic subjects?
 - Do you like working with your hands or solving real-world problems?
 - Are you interested in business, science, healthcare, or something creative?
 - Do you want to go to university later?
-

Example Pathways:

If you:

- ❤️ like math, science, or tech → **HTX** might suit you.
 - 🧠 love social studies, languages, or humanities → **STX** is a solid choice.
 - 📁 are interested in starting a business or working in finance → **HHX** is ideal.
 - 🔧 prefer practical work and want to start a career sooner → **EUD** or **EUX** (a mix of EUD and gymnasial level).
-

One more thing:

As someone with roots in Indonesia, you might also consider how your cultural background can be a strength. Speaking another language or understanding a different culture can be a huge plus in fields like business, international relations, education, and healthcare.

If you'd like, I can help you explore specific programs or schools near where you live in Denmark — just tell me your city or region.

Would you like to tell me more about what interests you or what kind of future you imagine?
