

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Italy. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great point in life to think about your future! Since you're 16 and just finished primary school (in Denmark, that likely means **Folkeskole**, up to 9th or 10th grade), you're now deciding between different upper secondary education options. The best path depends on your **interests**, **strengths**, and **future goals**.

Here's an overview of your options in Denmark, followed by recommendations based on different interests:

1. Gymnasiale uddannelser (Upper Secondary General Education)

These prepare you for university:

STX (Studentereksamen)

- Focus: Humanities, science, social science
- Good if: You like a broad academic education and want to go to university later.

HTX (Higher Technical Examination Programme)

- Focus: Technology and natural sciences
- Good if: You're into science, IT, or engineering.

HHX (Higher Commercial Examination Programme)

- Focus: Business, economics, international trade
- Good if: You're into business, economics, or want to study something like marketing or international trade.

HF (Higher Preparatory Examination)

- Focus: Shorter (2 years), more practical
- Good if: You want a quicker route to higher education or a more flexible/less theoretical program.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These prepare you for a job right away, but you can also continue to higher education later.

- Focus: Hands-on learning with apprenticeships in areas like carpentry, plumbing, IT support, hairdressing, etc.

- Good if: You want to start working sooner, learn by doing, or already know a trade you enjoy.

There's also **EUX**, which combines vocational training with general education, so you can go to university later if you want.

Recommendations Based on Interest:

Interest / Future Goal	Suggested Path
"I want to go to university"	STX, HTX, HHX, or HF
"I like hands-on, practical work"	EUD or EUX
"I like business or economics"	HHX
"I like science and tech"	HTX
"I like literature or languages"	STX (with humanities focus)
"I want to work soon, but maybe study later"	EUX
"I'm unsure and want to keep doors open"	STX or EUX

Bonus Advice (since you're Italian-Danish):

- Being bilingual is a **huge advantage**. Consider programs where language, international business, or intercultural skills are important (HHX could be very interesting).
- Later, you could consider Erasmus programs or other international options where your Italian roots are an asset.

If you'd like, I can help you:

- Compare specific schools near you.
- Explore programs based on your hobbies or dream jobs.
- Look at what a week in one of these schools would look like.

Would you like that? And do you already have any idea what you enjoy most—science, art, business, helping people, tech, etc.?
