

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Jamaica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that — it's great that you're thinking about your next steps so thoughtfully. Since you're 16 and just finished **primary school** in Denmark (likely meaning **folkeskole**), you're now at the stage where most students consider **youth education (ungdomsuddannelse)**. In Denmark, you have a few main paths to choose from, and the right one depends on your **interests, goals, and learning style**.

Here are your main options:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These prepare you for higher education (university, university colleges, etc.). Best if you enjoy academic subjects.

- **STX (Alment gymnasium):** Broad academic program (science, humanities, social science).
- **HHX (Handelsskole):** Focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium):** Focus on science, technology, and engineering.
- **HF (Højere Forberedelseksamen):** 2-year program, more flexible, often used by people who want to go to university or a professional college.

✓ Good if:

- You enjoy studying.
- You want to go to university later.
- You're unsure what you want, but want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training - EUD/EGU)

These are for learning a trade or practical job (electrician, carpenter, hairdresser, chef, etc.). They combine school with paid internships.

✓ Good if:

- You prefer hands-on learning.
- You want to start working sooner.
- You know you want to work in a trade or practical field.

You can also choose **EUX**, which combines vocational training with academic courses — so you can both work in a trade and go to university later.

How to Decide

Here are some questions to help guide you:

- Do you enjoy school and studying, or prefer hands-on learning?
- Are you interested in business, science, creative fields, tech, or something else?
- Do you want to go to university or get into the workforce sooner?
- Do you want to study in Denmark only, or possibly abroad too (your background could help with that)?

Personal Tip

Since you're bilingual and have Jamaican roots, you might have strengths in languages, culture, or international communication. That could point you toward:

- **HHX** (business/international trade).
- **STX with language or social science focus.**
- Or eventually, **international studies, communication, or education.**

Next Steps

1. **Talk to your UU-vejleder (youth guidance counselor)** – they help with choosing the right path.
2. Visit **open house events** at local gymnasiums or vocational schools.
3. Think about trying **brobygning (bridge-building programs)** where you can try different education types before choosing.

If you tell me more about your **interests, strengths**, or dreams (like "I want to run a business" or "I like tech"), I can give you a more personalized suggestion.
