

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Jamaica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a really good moment to start thinking carefully about your future—well done for doing that already. Since you've just finished primary school (what we call "folkeskolen" in Denmark), you're probably considering one of the main educational paths for youth. The best choice depends on your interests, strengths, and future goals, so let me walk you through the main options and what they can lead to.

1. Gymnasiale uddannelser (Upper Secondary Education)

These are general academic programs that prepare you for university. There are different types:

STX – Studentereksamen

- Focus: Broad academic subjects (Danish, English, science, social studies, etc.)
- Good if you enjoy a mix of subjects and want to go to university later.

HHX – Higher Commercial Examination

- Focus: Business, economics, marketing, and languages.
- Good if you're interested in business or international careers.

HTX – Higher Technical Examination

- Focus: Technology, natural sciences, innovation.
- Great if you're into science, IT, or engineering.

HF – Higher Preparatory Examination

- Shorter (2 years), more practical.
- Suitable if you're unsure about a long academic program or want a quicker route to university.

Recommended if:

You're interested in going to university or exploring broad academic topics. It keeps a lot of doors open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are more hands-on and lead directly to skilled jobs.

- Examples: Electrician, chef, hairdresser, mechanic, healthcare assistant, carpenter.
- Often combine school and apprenticeships.
- Takes around 3-5 years depending on your path.

Recommended if:

You prefer practical work, want to start earning sooner, or like learning by doing rather than reading/writing all the time.

3. Other Options

- **Kunstskole (Art School):** If you're creative—drawing, music, design.
- **Idrætsefterskole/Sports schools:** If you're into sports and want to combine education with training.
- **International programs:** If you want an English-speaking or globally-minded path (especially since your background is Jamaican and you speak Danish fluently).

How to Choose?

Ask yourself:

- What subjects do I enjoy most?
- Do I prefer academic or practical learning?
- Do I want to go to university, or do I want to start working earlier?
- Am I interested in starting my own business someday?

You can also talk to a **UU-vejleder (Youth Guidance Counselor)**—they're trained to help young people in Denmark find the right path.

Example Scenarios

1. **You like science and tech:** → Go for **HTX**
2. **You enjoy business or want to run your own company someday:** → Try **HHX**
3. **You love helping people and want to work in healthcare:** → Vocational track in **SOSU**
4. **You're not sure but want to keep options open:** → Choose **STX** or **HF**

If you tell me more about your interests or what kind of job you'd like in the future, I can give you a more tailored recommendation.
