

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Japan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that – it's great that you're thinking carefully about your next steps. Since you've just finished primary school in Denmark (likely after **9th or 10th grade**, depending), your next step usually involves choosing between several main paths in the Danish education system. I'll outline the main options and help you consider which might fit you best based on your interests, strengths, and future goals.

🎓 1. General Upper Secondary Education (Gymnasiale uddannelser)

These are academic programs that prepare you for university.

Options:

- **STX (Studentereksamen)** – Broad and academic; includes humanities, science, and social science.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and language.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere Forberedelseseksamen)** – A shorter, 2-year option, more flexible, for students who may want a more practical/academic balance.

Best if you:

- Want to go to university.
- Like academic learning (languages, science, business, etc.).
- Enjoy theory and analysis.

🔧 2. Vocational Education and Training (EUD – Erhvervsuddannelse)

A mix of school and apprenticeship that leads directly to a profession or trade (e.g., electrician, chef, hairdresser, carpenter).

Best if you:

- Want hands-on learning.
- Want to start working sooner.
- Are interested in skilled trades or technical careers.

There's also **EUX**, which combines vocational training with subjects that qualify you for university later – a great hybrid option.

3. International or Language-Focused Programs

Since you have a Japanese background and are fluent in Danish, you might have strengths in multicultural communication. If you're also good at English or Japanese, you could consider:

- **International Baccalaureate (IB)** – Taught in English, internationally recognized.
- Language-heavy tracks in STX or HHX.

Best if you:

- Might want to study or work abroad.
- Have strong language skills and want an international environment.

Bonus: Japanese-Danish Identity

Your cultural background could be a major asset. If you're interested, you could:

- Study Japanese or Asian Studies later at university.
- Use your bilingualism in business, translation, diplomacy, or cultural exchange.

What to Consider When Choosing:

Ask yourself:

- Do I enjoy academic learning, or prefer practical, hands-on work?
- Do I want to go to university someday?
- What subjects do I enjoy most (math, languages, science, business)?
- Do I want to start working soon or study longer?

My Recommendation (If You're Still Unsure):

Start with a **STX** program unless you have a strong pull toward technical or vocational paths. STX keeps your options open for university and lets you explore a broad range of subjects. If you love business or technology, HHX or HTX might suit better.

If you're curious about international study and are strong in English, the **IB** program could be a fantastic way to combine your multicultural background with a strong academic path.

Would you like help finding specific schools or programs near you? Or want to talk about your interests (like favorite subjects or career ideas)? That would help me give you even more personal guidance.
