

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Japan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing a bit about yourself — it sounds like you're in an exciting stage of life with a lot of great opportunities ahead. Since you just finished primary school in Denmark (Folkeskole), you're probably looking at options like **gymnasium (STX, HTX, HHX)**, **erhvervsuddannelser (vocational education)**, or **10th grade**, depending on your interests and long-term goals. Here's a breakdown of your main paths, with some suggestions tailored to your situation:

🎓 1. Gymnasium (Upper Secondary School – 3 years)

This is the most common route if you're aiming for university later.

Options:

- **STX (Almen Studentereksamen):** Broad academic focus — humanities, social sciences, natural sciences.
 - *Great if you're not sure yet and want to keep doors open.*
- **HTX (Teknisk Studentereksamen):** Focus on science, tech, and engineering.
 - *Good if you're into STEM subjects or technical design.*
- **HHX (Højere Handelseksamen):** Focus on business, economics, and marketing.
 - *Useful if you're thinking of entrepreneurship or working in international business.*

Recommended if:

You like studying academically and may want to go to university later (e.g., in Denmark, Japan, or elsewhere).

👷 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

Combines school with hands-on work experience (apprenticeship-style). You get a trade qualification.

Examples:

- Electrician, carpenter, chef, media graphic designer, IT-supporter, etc.
- You can also take an **EUX** (combines vocational training with academic subjects so you can go to university too).

Recommended if:

You enjoy working practically and want to get into the job market faster — but still want the option to study later.

3. 10th Grade (10. klasse)

An optional year to mature, figure things out, or improve your grades before starting youth education.

- Often taken at **efterskole** (boarding school with special focus – e.g., arts, sports, global citizenship).
- Can be great for personal development, especially if you're not 100% sure what path you want.

Recommended if:

You're unsure of your direction, want to grow socially, or explore a specific interest more deeply.

Bonus Tip: Use Your Japanese Heritage

Being bilingual and bicultural is a huge asset. You could:

- Take Japanese as a second language in STX (some schools offer it).
- Consider exchange programs with Japan.
- Later pursue international studies, translation, or global business roles.

What Should You Consider?

Here are a few guiding questions:

- Do you enjoy academic schoolwork and exams?
- Are you more hands-on or more theoretical?
- Do you already have a dream career or interest area?
- Would you enjoy living at an efterskole for a year?
- Do you want to keep the door open for university?

Suggestion Based on What You've Said:

Since you're fluent in Danish, born in Denmark, and just finished primary school, I would recommend **STX** or **HTX** if you're curious, academically capable, and not sure exactly what you want yet. These programs offer broad opportunities, and you can always specialize later.

But if you want to try something different first, a **10th grade at an efterskole** could also be a fantastic personal and social experience.

Let me know your interests (e.g., science, arts, tech, business, languages), and I can give a more specific recommendation.
